ABSTRACT

This colloquium will cover the use of PowerPoint animations to teach scheduling concepts and techniques. Several examples of these animations will be presented. All examples presented have been successfully classroom tested. This colloquium will also provide general advice for those interested in creating PowerPoint animations and technical details of how to utilize advanced features of PowerPoint animation to efficiently create your own. A discussion of the benefits of using these PowerPoint animations will conclude the session. Attendees are invited to bring their own scheduling animations to share.
