Welcome Message from Program Chair

Dear Colleagues,

As the representative of the WDSI Board, it is my great pleasure to extend a warm welcome to the 2023 Western Decision Sciences Institute (WDSI) Conference in Portland, Oregon. Hosting this event is an honor as we continue our journey into the next 50 years after celebrating our 50th anniversary last year. We are grateful for your presence, and we extend a sincere welcome to our new members, hoping they will become an integral part of our organization and support WDSI and DSI.

The Covid-19 pandemic has presented many challenges, and unfortunately, one of the greatest losses our organization has suffered was the passing of our dear friend and past president, Dr. Karen L. Fowler. Karen was an integral part of our community, and her leadership during her tenure as WDSI president in 1999-2000 was greatly appreciated. Her dedication and commitment to our organization were unwavering, and her passing is a significant loss to all of us. Her legacy will continue to inspire and guide us, and we will always remember her contributions to our community. As we gather for this year's conference, we take a moment to remember Karen and the impact she had on our organization.

I am honored to serve as this year's Program Chair and am looking forward to continuing the celebration of our professional achievements while building stronger and lasting relationships as we embark on this journey together. Over the past 50 years, WDSI members have made significant contributions in research, teaching, and practice, impacting many disciplines. Our conference provides an opportunity to share our ideas and exchange thoughts on how to continue charting our journey forward to reach new heights. At WDSI, every individual's contribution is voluntary, and we pride ourselves on creating genuine connections, building a community, and prioritizing the experience. Our vision is to continue fostering these relationships and creating value for our current and future members. We hope that this conference will allow our members to reflect on and celebrate their past accomplishments, renew friendships, and extend their networks.

We are delighted to come together for this year's conference. Our aim is to provide our members with a platform to reconnect, inspire one another, and generate new ideas. I extend my deepest gratitude to all those who have worked tirelessly to bring this event to fruition, including Past President Omer Benli, Immediate Past President Theodore Byrne, and current President Salem Boumediene, for their outstanding leadership of WDSI. I would like to extend my special thanks to WDSI Treasurer Sheldon Smith for his invaluable guidance, WDSI Director of Information Systems Khosrow Moshirvaziri for his exceptional support, President-elect Pia Gupta for her guidance and camaraderie, as well as Stan Griffis and Seong-Jong Joo for their assistance and motivation. I would like to thank Eldon Li, Mahyar Amouzegar, David Yen, Albert Huang, Omer Benli, and many other WDSI colleagues for your continued mentorships. I also express my

appreciation to my dear colleague Shuo Zeng for his assistance in organizing the conference program.

I thank all the Track Chairs, Awards Committee members, Vivian Landrum, Executive Director of DSI, our parent organization, and our financial sponsors for their contributions. Finally, I want to thank you, our conference participants, for your contributions, which form the foundation of this conference.

As we gather in Portland, let us build on our past achievements, look to the future with optimism and determination, and create a brighter future for WDSI and our profession. Together, we can make the most of this opportunity to learn from one another, share our experiences and ideas, and strengthen our professional relationships.

Thank you, and I look forward to seeing you at WDSI 2023 in Portland!

Sincerely,

Yuanjie (Ed) He
California State Polytechnic University, Pomona
WDSI 2023 Vice-President, Program Chair

ABOUT THE INSTITUTES

DECISION SCIENCES INSTITUTE (DSI) <https://decisionsciences.org/>

- **President:** Natalie Simpson, State University of New York Buffalo
- **President Elect:** David Dobrzykowski, University of Arkansas
- **Immediate Past President:** Joy Field, Boston College

The Decision Sciences Institute is an interdisciplinary, international organization dedicated to the advancement of the science and practice of education and research about business decisions. It promotes excellence in teaching and scholarship and seeks to serve current and future developmental needs of doctoral students, faculty, and academic administrators. Through its journals, Decision Sciences, Decision Sciences Journal of Innovative Education and the online publication Decision Line, national and regional meetings, and other activities, it serves as a vehicle to advance and disseminate the theory, application, pedagogy, and curriculum development of the decision sciences.

WESTERN DECISION SCIENCES INSTITUTE (WDSI) <http://www.wdsinet.org/>

- **President:** Salem Boumediene, University of Illinois Springfield
- **President Elect:** Pia Gupta, California State University, Long Beach
- **Vice President, Program Chair:** Yuanjie He, California State Polytechnic University, Pomona
- **Vice President, Program Chair Elect:** Stanley E. Griffis, Michigan State University
- **Vice President, Marketing and Advancement:** Seong-Jong Joo, Air Force Institute of Technology
- **Secretary/Treasurer:** Sheldon R. Smith, Utah Valley University
- **Director of Information Systems:** Khosrow Moshirvaziri, California State University, Long Beach
- **Immediate Past President:** Theodore Byrne, California State University Dominguez Hills

The Western Decision Sciences Institute is a regional division of the Decision Sciences Institute. It serves its interdisciplinary academic and business members primarily through the organization of an annual conference and the publication of the Journal of Business and Management. The conference and journal allow academicians and business professionals from all over the world to share information and research with respect to all aspects of education, business, and organizational decisions.

PAST WDSI PRESIDENTS

Paper ID: 4 MODELING THE ONLINE GLOBAL FUNDRAISING MARKET: A COMPARATIVE STUDY OF UNITED STATES VS. UNITED KINGDOM

Wednesday, April 5, 2023 10:00 AM Salon D

Total size of the global crowdfunding market has reached over 12 billion dollars. This market is expected to double in size by 2027—growing at an annual rate of 11%. The two largest players in this market are the US and the UK. While the total size of US economy was about eight times larger than the UK economy in 2020, the share of crowdfunding activities from the UK economy is more than 20% higher compared with the US economy. This raises the question as why the largest economy in the world is falling behind a trending technology-based method of fundraising.

Paper ID: 5 INTEGRATED PERFORMANCE ASSESSMENT (I-PASS) ANALYSIS APPROACH TO IMPROVING GOVERNMENT SUPPLY CHAINS

Wednesday, April 5, 2023 1:00 PM Salon D

Supply chains are rapidly changing. Knowing how to make supply chains efficient and effective is more important than ever, but sometimes the challenge is knowing what to focus on and which practices to implement. Our team developed the I-PASS method to provide a structured approach for evaluating and improving public sector logistics and supply chain operations. Using our experience and I-PASS, we identify, adapt, and apply commercial best practices to be implemented in government supply chains. I-PASS is a standardized set of tasks, inputs, and outputs that we use to quickly evaluate government supply chain operations.

Paper ID: 7 DOES INFORMATION DISCLOSED IN “USE OF PROCEEDS” FROM PROSPECTUSES AFFECT IPO INITIAL UNDERPRICING?

Friday, April 7, 2023 8:00 AM Salon C

We study the impact of intended use of proceeds disclosed in “Use of Proceeds” in prospectuses on ChiNext IPOs’ initial underpricing. After splitting the entire period into two non-overlapping sub-periods to control for regulatory changes, firm-level characteristics and market conditions, we find that the overall information disclosed from “Use of Proceeds” affects IPO initial underpricing. The proceeds raised for IPO firms’ information platform and research and development over the 2nd sub-period while the proceeds to promote marketing and sales and to expand existing products over the 1st sub-period are significantly and positively related to initial underpricing. We explore the results.

Paper ID: 9 CUSTOMERS’ ATTITUDE TOWARDS ROBOTS IN HOTELS DURING THE PANDEMIC: ROLE OF DEMOGRAPHIC FACTORS

Thursday, April 6, 2023 8:00 AM Salon A

Several studies have suggested that different demographic factors influence customers’ technology adoption behavior. Using a sample of 525 participants this study uses MANOVA test to investigate the differences of attitude towards robots in 5 areas of a hotel (front desk, concierge, housekeeping, and food and beverage) and the level of involvement of customers among different groups of each factor (age, gender, income level, education, and purpose of trip). The findings show significant difference among groups for all the dependent variables. This study is timely, as it looks at the customer attitude towards using robot in hotel during the pandemic.

Paper ID: 11 THE INFLUENCE OF POLITICAL IDEOLOGY AND POLITICAL AWARENESS ON INDIVIDUAL ACCEPTANCE OF MULTICULTURALISM

Thursday, April 6, 2023 1:00 PM Salon D

We live in a world where diversity is increasingly being valued. Academics and practitioners are both interested in understanding factors that drive diversity. This study investigates one important aspect of diversity - cultural diversity - and focuses on finding what drives people to accept a multicultural society. A review of existing literature highlights a limited understanding of individual factors and their role in driving attitudes toward multiculturalism. To address this gap, this study theorizes that two important individual factors, political ideology, and political awareness, are important influencers of people’s acceptance of multiculturalism. We are using the LISS dataset surveys (Netherlands).

Paper ID: 12 IMPACT OF POLITICAL IDEOLOGY ON CLIMATE CHANGE

Friday, April 7, 2023 10:00 AM Salon B

Climate change is one of the most serious global challenges currently faced by humanity. Governments worldwide are increasingly interested in addressing this phenomenon by instituting policies and programs. Designing effective policies and programs requires us to gain an academic understanding of factors that influence people’s perceptions of climate change. In this study, I theorize that people’s perceptions about climate change are influenced by their political ideology. The theory is tested using data from a representative survey of the residents in the state of Nevada (NV). Political ideology is measured as being liberal/conservative/moderate. Keywords— Climate Change, Political Ideology, Conservative, Liberals.

Paper ID: 13 CEO COMPENSATION STRUCTURE AND MARKET VALUE OF CORPORATE SPIN-OFFS: EXAMINING THE MODERATING EFFECT OF CEO DUALITY

Wednesday, April 5, 2023 1:00 PM Salon B

Corporate spin-offs aim to help both divesting (parent) and spun-off (child) companies to boost their shareholder value. In this study, grounded in the agency theory, we examine the effect of CEO compensation mix on the change in market valuation of spun-off subsidiaries based on 138 spin-off cases between 2000 and 2014. Our empirical evidence shows that there is a positive and significant relationship between CEO compensation mix and market performance of the child firm. We also look at the moderating effect of CEO duality on our main relationship, which leads to another positive and significant association.

Paper ID: 14 BLOOMBERG TERMINAL AND DIVIDEND GROWTH FOR STOCK VALUATION MODEL

Friday, April 7, 2023 8:00 AM Salon C

We use data from the Bloomberg Terminal and estimate the implied perpetual dividend growth of all dividend-paying stocks in the S&P500 index cross-sectionally and over time. We show that we can use the computed implied growth rate for a stock valuation model in an Excel spreadsheet. Our new approach to growth rate estimation can help to enhance students' technological and quantitative skills and their knowledge of stock valuation applications.

Paper ID: 16 PRICESMART'S AMIGOS Y FAMILIA PROGRAM FOR EL SALVADOR

Wednesday, April 5, 2023 3:00 PM Salon C

This case follows PriceSmart, the largest membership "warehouse club" operation in Central America, South America, and the Caribbean. Attracted by the high rate of remittances to El Salvador, the company is investigating whether to address this as a business opportunity. If so, the question is how to operationalize this opportunity.

Paper ID: 17 A DESIGN OF EMERGENCY LOGISTICS NETWORK WITH A SOCIAL VULNERABILITY INDEX

Wednesday, April 5, 2023 8:00 AM Salon D

This paper applies the Center for Disease Control and Prevention's Social Vulnerability Index (SVI) to an emergency logistics network (ELN) design problem. A community with a higher SVI should be given a higher priority in case of emergency. We propose two SVI-based facility location-allocation (FLA) models with a multi-sourcing system—one with a soft SVI constraint by maximizing SVI in the objective function and the other with a hard-SVI constraint by considering SVI in the constraint and minimize the total logistics costs. The case study analyzes the proposed models' performance and compares them with the traditional FLA without the SVI.

Paper ID: 18 CONSIDERATIONS FOR ROTH IRA CONVERSIONS

Thursday, April 6, 2023 3:00 PM Salon A

This paper describes many factors that should be considered by those who are contemplating an IRA to Roth IRA conversion. While these conversions can be very helpful to some taxpayers, certain qualifications must be met, and individuals should be sure they understand the ramifications before they convert amounts to Roth IRAs.

Paper ID: 19 COORDINATION IMPROVEMENT IN A TWO-PERIOD PROJECT UTILIZING A NOISE PROOF EQUILIBRIUM SELECTION

Wednesday, April 5, 2023 8:00 AM Salon C

We develop a game-theoretical model to study a project governed by the risk-sharing contract in which the project's outcome depends on the minimum contractors' progress on their task. Each contractor's progress on its task is determined by the effort exerted and a random environmental shock out of the contractor's control. When the cost-revenue ratio of per-unit effort is low, the result shows that no intervention by the OEM is needed; there exists a unique equilibrium, achieving full coordination. Otherwise, contractors exert the lowest possible effort, leading to coordination failure. To improve coordination, we introduced midterm feedback on contractors' progress.

Paper ID: 20 ZIGZAG MANIFOLD SEARCH FOR MULTI-OBJECTIVE OPTIMIZATION

Wednesday, April 5, 2023 8:00 AM Salon G

Decision making based on multiple criteria is ubiquitous in business and engineering problems. To find the tradeoff (Pareto) optimal solutions is searching the solutions within an embedded manifold. The geometric structure of such manifolds is usually complex, and thus the optimization process is computationally challenging. We present and discuss the idea of a high-dimensional zigzag search method for multi-objective optimization problems. Some numerical examples considering 3 or more objectives will be tested and analyzed to demonstrate the efficiency of the proposed zigzag search method.

Paper ID: 24 HYBRID RENEWABLE ENERGY SUPPLY CHAIN OPTIMIZATION

Wednesday, April 5, 2023 1:00 PM Salon G

This study is motivated by the challenges faced by weak economies in addressing their energy deficiency. A strategic development of a renewable energy system is proposed as opportunities to alleviate the connected energy and economy issues. The optimization model designs a renewable energy supply network with the objective to minimize the energy gap under budget and resource availability constraints. The analysis highlights that the cost for the optimum development of a renewable energy system can significantly vary over the planning horizon. It starts as a centralized system and evolves into a decentralized system in which facilities and power supply locally.

Paper ID: 25 EVOLUTION OF THE WORLD WIDE WEB TO WEB3

Thursday, April 6, 2023 1:00 PM Salon A

We are at the start of a new Web era, referred to as Web3. It aims to decentralize the Web and place the control directly to content creators, and take some power away from the powerful Platforms, like Netflix and Spotify. Web3 can also be the infrastructure to power the Metaverse, in which virtual spaces are created by the convergence of enhanced, replicated physical entities, and digital reality. Transactions on Web3 can be decentralized using cryptocurrencies, digital currencies and non-fungible tokens (NFTs). This purpose of this research is to discuss the various trends that are reshaping and advancing the Web.

Paper ID: 26 ATTACHMENT AND CONSUMPTION EXTERNALITIES: THE BENEFITS OF PRODUCT PAROCHIALISM

Thursday, April 6, 2023 8:00 AM Salon B

The emerging demand-side literature offers a fresh perspective on strategic decisions. Building on this emerging stream, we propose that the geographic diversity of a firm's consumers can have important performance implications. We examine the effects of consumer geographic diversity in the context of competitive football games during the 2016 presidential election. We argue that consumption externalities arise from consumption in close proximity with other consumers, which may benefit more geographically parochial customer segments. Our results generally support the notion that parochial products, targeted toward a narrow consumer geography, may enjoy a strategic benefit of greater loyalty through consumption externalities.

Paper ID: 28 DO CONSULTING SERVICES AFFECT AUDIT QUALITY? EVIDENCE FROM THE WORKFORCE

Wednesday, April 5, 2023 1:00 PM Salon A

In this paper we investigate how consulting affect audit quality using a comprehensive dataset of employment profiles, covering 86% of all employees at large U.S. public accounting firms. In our empirical analyses, we document a positive effect of consulting employees on audit quality. Specifically, a one standard deviation increase in the share of consulting employees in an office results in a 2.7 percentage point reduction in restatements (a decrease of 19% relative to the baseline). This effect is strongest when consulting employees have skills complimentary to auditors, such as special industry, technical, and management skills, supporting the knowledge sharing hypothesis.

Paper ID: 30 EFFICACY OF AUTHENTIC SELF-EXPRESSION IN NEWCOMER ORIENTATION

Thursday, April 6, 2023 8:00 AM Salon B

This longitudinal quasi-field experiment tests the efficacy of an authentic self-expression (ASE) program on both proximal outcomes (i.e., perceived stress and popularity) and distal outcome (i.e., job performance) of new newcomer adjustment. Two cohorts of newly hired nurses were followed up four times post-entry (at Months 3, 6, 9, and 12, respectively), with the first cohort receiving a traditional orientation program (control) and the second cohort receiving an ASE program (treatment). Results suggest that the ASE orientation was more effective than the traditional orientation in enhancing newcomer's job performance via two distinct mechanisms: reducing stress and gaining popularity.

Paper ID: 33 EXPOLORING STUDENT ENGAGEMENT VIA GAMIFICATION AND LEADERBOARD DESIGN

Wednesday, April 5, 2023 10:00 AM Salon A

Along with the popularity of gamification, there has been increased interest in using leaderboards to promote engagement with online learning systems. The existing literature suggests that leaderboards can result in both improved and detrimental outcomes in engagement. To move the discipline of gamification forward, rigorous studies are needed that compare various leaderboard designs in terms of actual engagement with the information system. Accordingly, this study uses a case study to discover leaderboard designs that lead to engagement in an online discussion. The results provide three conditions needed to improve student engagement via leaderboards.

Paper ID: 36 PRICING AIRBNB USING MACHINE LEARNING - LITERATURE REVIEW AND A THEORETICAL MODEL

Wednesday, April 5, 2023 8:00 AM Salon B

As the use of Airbnb continues to grow as a preferred form of accommodation for travelers, many are drawn to the platform's cost-effective options, desire locations, and various amenities. However, some hosts may struggle with determining the optimal pricing for their listings. To address this issue, this study conducts a comprehensive literature review of relevant articles and develops a theoretical model identifying the crucial factors and techniques for predicting Airbnb prices. This research serves as the foundation for creating simpler, more efficient, and more accurate models for determining Airbnb listing prices.

Paper ID: 37 CONSUMER EXPECTATION STUDY ON MICROGRID ADOPTION

Wednesday, April 5, 2023 1:00 PM Salon G

We conduct a survey in this study to examine factors that affect consumers' perception of the microgrid. We provide the first empirical study to test the factors and impacts on the intention to adopt microgrids. We also provide practical insights into microgrid decision-making and emphasize possible avenues for future research. Possible topics such as cybersecurity involved in adopting microgrids will also be investigated and discussed.

Paper ID: 38 USING OF COGNITION-AFFECT-BEHAVIOR MODEL ON MOBILE LOCATION-BASED ADVERTISEMENT (LBA): THE DELIVERY TYPE OF LBA AS A MODERATOR

Thursday, April 6, 2023 10:00 AM Salon B

This study combined characteristics of mobile location-based advertisement (MLBA) and the cognition-affect-behavior model to discuss the influences of consumers' emotional states and further leading to continued usage of mobile location-based advertisement. A total of 579 respondents who have been using a mobile location-based advertisement. The empirical results showed all cognitive factors of mobile location-based advertisement have significant effects on utilitarian benefits and privacy concerns, the effects were moving forward on predicting energetic and tense arousal, as well as pleasure, which leading continued usage of mobile location-based advertisement. Keywords: Mobile location-based advertising (MLBA), cognition-affect-behavior, utilitarian benefit, privacy concern, energetic arousal.

Paper ID: 39 MATCHING THE DESIGN OF INFORMATION TECHNOLOGY PROGRESS INDICATORS TO USERS' MENTAL MODELS

Wednesday, April 5, 2023 3:00 PM Salon D

Progress indicators are graphics that appear on screen to inform users of the progress made as a task moves toward completion. This study investigates the matching of progress indicator design to users' mental models. Pairs of progress indicators were presented to participants in a data elicitation exercise. The features of one progress indicator in each pair were designed to match the mental model of users. The features of the second progress indicator were designed contrary to the users' mental model. Data supports the contention that participants prefer progress indicators designed to match their mental models.

Paper ID: 42 EXPLORING THE TRENDS OF VOLUNTARY BEHAVIOR IN THE TIME OF COVID19 PANDEMIC: LESSONS FOR ENGAGING CITIZENS AS VOLUNTEERS DURING CRISIS TIME

Thursday, April 6, 2023 3:00 PM Salon D

Volunteering provides numerous psychological and behavioral benefits for citizens during a time of crisis, yet such benefits are not well documented by empirical studies. Based on in-depth interviews with managers and staff of L.A. Works (the largest volunteering platform in the Greater Los Angeles Area) as well as volunteer registration and website usage data, this study examines the trends of citizens' voluntary behavior in association with the trends of the COVID19 pandemic. Findings provide theoretical and practical contributions to nonprofit management and volunteering literature through expanding the understanding of the needs, motivation, and consequences of citizen volunteering during crisis time.

Paper ID: 43 FIRST IN FIRST EXPIRED OUT: AN AGENCY THEORY EXAMINATION OF LAST MILE GROCERY DELIVERY

Wednesday, April 5, 2023 8:00 AM Salon D

Retailers are increasingly implementing online orders of groceries with the utilization of either third party delivery, or with grocery pickups. The implementation of this order fulfillment process of groceries benefits the vendor rather than the customer, as online order fulfillment incentivizes the order fulfillment process to consist of products that have the shortest shelf life, while the customer prefers products that have the longest shelf life. This research utilizes an agency theory framework to examine what variables affect the reconciliation of the aforementioned differing objectives. Implications for last mile grocery delivery and opportunities for further research will be discussed.

Paper ID: 49 MUNICIPAL FISCAL HEALTH DURING THE COVID-19 PANDEMIC: FEDERAL ASSISTANCE AND LOCAL ACTIONS

Thursday, April 6, 2023 3:00 PM Salon D

The COVID-19 pandemic has created unprecedented challenges for public health and local economies. Despite the initial revenue shocks, with the federal stimulus funds from the American Rescue Plan Act of 2021 and increases in local property tax and other taxes, most California cities are projected to recover from the pandemic-related revenue losses. Based on data from over 450 California cities, this paper examines the impact of the pandemic on municipal fiscal health using quantitative methods. The study contributes to the public finance literature regarding fiscal federalism and has practical implications for local public managers on maintaining their cities' fiscal health.

Paper ID: 50 COLLABORATIVE LOGISTIC VEHICLE ROUTING PROBLEM AMONG SMALL SHIPPERS: A NEW GENETIC ALGORITHM APPROACH

Thursday, April 6, 2023 3:00 PM Salon C

This is an extended version of VRPSD to solve collaborative logistics vehicle routing problems with split deliveries (CoVRPSD). The origin of each vehicle route can be one of the suppliers. We assume that the total vehicle capacity in the supply chain is greater than or equal to the total demand. However, the total capacity of each supplier might not cover its own demand, and therefore, we implement collaboration in the supply chain. We performed a series of numerical experiments and utilized a genetic algorithm to determine the position of the proposed model in comparison with the other VRP variants.

Paper ID: 51 PUNCTUATED EQUILIBRIUM DYNAMICS IN TIMES OF CRISIS: ASSESSING GENERALIZABILITY TO DIFFERENT POLITICAL SYSTEMS AND TEMPORAL INVARIANCE

Thursday, April 6, 2023 3:00 PM Salon D

Policy responses to issues of national interest are usually disproportionate to potential policy costs or benefits. These patterns are explained by punctuated equilibrium dynamics. While research is rich in its empirical support for PET dynamics, less is known about whether these generalize to a broad range of political systems and hold true in compressed timeframes. Using time series data, we examine univariate distributions of COVID-19 related policy changes for four groups of political systems. We test an implicit assumption of PET (i.e., temporal invariance), and demonstrate that PET dynamics exist in shortened timeframes during crisis.

Paper ID: 52 THE EFFECT OF TEAM-BASED ACTIVE LEARNING AND EMBEDDED TUTORS IN THE FIRST COURSE IN ACCOUNTING

Wednesday, April 5, 2023 8:00 AM Salon A

We evaluate the impact of active learning mode on student performance in first course in accounting as compared to a traditional instructor-led passive mode. We find positive results for active learning mode only in the final cumulative exam, indicating its impact on the long-term knowledge retention. We also test the effect of embedded tutors in active learning mode. The averages of all three exams of sections with embedded tutors are all significantly higher than those with no embedded tutors. When controlled for the outside tutoring time, the role of the embedded tutors remains significant in Exams 1 and 2.

Paper ID: 55 THE USE OF LATENT SEMANTIC ANALYSIS FOR UNDERSTANDING ONLINE HEALTH INFORMATION-SEEKING BEHAVIOR

Wednesday, April 5, 2023 10:00 AM Salon B

Search strategies that online health information seekers use can challenge health educators. We discuss applying latent semantic analysis (LSA) to assess online health information-seeking behaviors among millennials. The findings show that LSA on the information feedback allows for an improved understanding of information-seeking behavior and a better interpretation of survey data results. The study affirms the value of LSA in explaining the substantive educational utility of social media platforms on health topics. This study provides crucial methodological input for research on how to supplement survey data with textual analysis and develop effective delivery of online health education.

Paper ID: 56 WHAT INCLUSION WE OWE TO EACH OTHER: CONTRACTUALIST ARGUMENTS FOR WORKFORCE DIVERSITY, EQUITY, AND INCLUSION

Wednesday, April 5, 2023 3:00 PM Salon B

Starting from T.M. Scanlon's contractualism, this essay argues that companies have twin ethical obligations to pursue workforce diversity, equity, and inclusion (DEI). First, firms are obligated to employees as primary stakeholders; companies must make equitable distributions of high-quality jobs, raises, promotions, and so on. The second obligation comes from firms' effects on other stakeholders. Inequitable distributions of benefits and harms are often invisible to more privileged populations. Companies are thus obligated to hire diverse employees and empower them to shape company decisions, to better see and correct inequitable effects on other stakeholders. Keywords: diversity, inclusion, stakeholder theory, contractualism, ethical theory

Paper ID: 57 MULTICULTURALISM IN SOCIAL MEDIA ADS

Wednesday, April 5, 2023 3:00 PM Salon C

Evidence remains inconclusive on whether ethnic similarity between consumer and endorser leads to more positive ad evaluations. An ethnicity match between endorser and consumer might not result in changes in ad evaluation. Some consumers prefer ads featuring endorsers from a different ethnicity. Extending previous research on Hispanic consumer perceptions of social media endorsers, this study investigates whether featuring multiple endorsers from different ethnic groups in an ad result in overall ethnic identification and follow the same patterns of brand and ad liking as when audiences are exposed to an ad with just one endorser of the same ethnic make-up.

Paper ID: 58 AN APPLICATION OF DATA MINING TECHNIQUE ON SOCIAL MEDIA ADVERTISING: A FIELD STUDY

Wednesday, April 5, 2023 1:00 PM Salon C

Retailers launch their marketing campaigns on social media platforms, hoping to yield quick results and expand the geographical region of customers. However, the linkage between social media advertising and sales response remains debatable. This study uses data mining techniques to derive a decision model for a fashion shoe company to set out its social media advertising campaign. The findings yield four types of decision models with over 82% accuracy and provide the company with practical suggestions. The follow-up investigation suggests effective exposure to social media advertising leads to increased conversions and sales. Suggestions for future research are discussed.

Paper ID: 60 BROADENING THE HORIZONS: A POLYTECHNIC LEARNING APPROACH TO ADDRESS UNITED NATION'S SUSTAINABLE DEVELOPMENT GOALS

Friday, April 7, 2023 8:00 AM Salon A

Learning about Diversity, Equity, and Inclusion through the lens of the United Nation's Sustainable Development Goals. This paper introduces the innovative high-impact educational practice of collaborative learning through the intentional pedagogical approach focused on awareness of community and global challenges. First-year students in a comprehensive polytechnic university engage, address issues, draw in solutions and make recommendations to address UN sustainability goals. This paper identifies how students engage in collaborative learning to address real-world global challenges through a polytechnic learning approach and how to de-colonize the traditional pedagogical methodology by fostering intentional and transformational learning.

Paper ID: 62 ADDRESSING THE NEED OF GOVERNMENT WORKFORCE: FROM A JOB AGGREGATOR TOOL TO A PUBLIC SECTOR ALLIANCE

Thursday, April 6, 2023 1:00 PM Salon D

Between an aging workforce and a shortage of applications from talented young people, governments are struggling to recruit qualified personnel. Using university and industry-generated business data, this study seeks to answer the following research questions: (1) What do students see meanings in work? (2) What is the best medium for getting students to consider public sector jobs? (3) What additional tools, training, or information are needed to further develop a pipeline between diverse student bodies and public sector jobs? The study contributes to the public administration literature on recruitment and has implications for public managers on alliance building.

Paper ID: 63 HIPAA SECURITY AND PRIVACY COMPLIANCE – A CASE STUDY

Thursday, April 6, 2023 3:00 PM Salon B

Privacy and security have become major concerns. Business is under increasing scrutiny in security and privacy compliance with federal and local laws and regulations. Given the increasing number of security and privacy breaches occurred in recent years, we believe that there is a great need for advancing the understanding of security risks and mitigating strategies. This case study focuses on security and privacy compliance issues in HIPAA and includes detailed case study about one of the high-profile data breach attacks that happened back in 2015. This study also proposes a framework and solution kit for security professionals in the front-line.

Paper ID: 64 THE CARBON EMISSION CONSCIOUS MANUFACTURER

Wednesday, April 5, 2023 8:00 AM Salon D

This paper investigates the carbon emission conscious manufacture's decisions on production quantity and its effect. This paper integrates carbon emission cost to the traditional economic production quantity (epq) model and checks the new decisions of manufacturers, who are under carbon tax mechanism or carbon cap-and-trade mechanism, the most adopted ways to reduce carbon emission. The results provides insight to manufacturers under different carbon reduction mechanisms.

Paper ID: 65 QUARTERBACK WIN RATING: A SUPERIOR METHODOLOGY FOR EVALUATING QUARTERBACKS

Wednesday, April 5, 2023 10:00 AM Salon D

Given the importance of the quarterback position in football, the Passer Rating (Rate) and Total Quarterback Rating (QBR) formulas have been developed. In this paper, we present a superior methodology for evaluating quarterbacks: Quarterback Win Rating (QWR). With QWR we use quarterback winning percentage as the dependent variable, and other available quarterback statistics as possible independent variables. The independent variables chosen for a given year are selected through analyzing the previous five years of quarterback data through the use of stepwise multiple regression. In this way, the best model is picked every year and is tied to wins.

Paper ID: 66 STUDENT-MANAGED INVESTMENT FUNDS: INCORPORATION OF ESG IN DECISION-MAKING CRITERIA

Friday, April 7, 2023 8:00 AM Salon C

The survey (2022) addressed several issues, ESG emerged as the hottest topic. Respondents overwhelmingly recognized the term ESG, Socially Responsible Investing (SRI) and other terms appeared in their responses. The results were split as to whether ESG should be included in investment decisions. A by-product of the primary research conducted is that the secondary research from the literature review further indicates that there is quite a bit of variation in what variables should be included in an ESG evaluation of a firm and how to gather quantifiable metrics so that a common understanding of the data may be achieved.

Paper ID: 68 UNMANNED COMBAT AERIAL VEHICLE (UAV) APPLICATIONS IN MILITARY LOGISTICS: AN EXPLORATORY STUDY

Friday, April 7, 2023 8:00 AM Salon B

There are many Unmanned Combat Aerial Vehicles (UCAVs) in production and use worldwide. Military uses of UCAV technology have primarily contributed to warfighting efforts by providing Intelligence, Surveillance, and Reconnaissance applications via sensor payloads capable of providing multi-purpose imaging, surveying, and mapping products. Less known are the potential UCAV logistics applications. This paper explores the feasibility of armed and unarmed military drone cargo delivery options from a technical and operational standpoint. Emphasis is placed on the time-sensitive delivery of critical supplies, such as medicines, rearmaments, and dangerous goods in difficult delivery situations, inclement weather, and Beyond Line of Sight (BLOS).

Paper ID: 69 ZILLOW GROUP, INC.: CHANGING THE WAY AMERICANS BUY HOMES

Thursday, April 6, 2023 8:00 AM Salon B

This case explores the growth of Zillow from its inception to a successful company. It started as a platform making income from advertising and then grew into a name synonymous with real estate. It now has three divisions: Home Sales, Internet Media and Technology (IMT), and Zestimate. It forever changed an older tradition bound industry but has enabled other cutting edge technology companies to enter in the future. Students will examine how an industry disruptor grew from an idea into one of the technological companies it is today. The question becomes how does it maintain its momentum?

Paper ID: 71 NEWGEN SURGICAL: SUSTAINABLE SOURCING CHALLENGES DURING THE POST-PANDEMIC ERA

Thursday, April 6, 2023 8:00 AM Salon D

Businesses around the world face increasing supply chain challenges, due to post-pandemic supply and demand distress, restrictions imposed on global trade, and the US-China trade war. This study investigates how these challenges affect NewGen Surgical, a small US-based medical equipment manufacturer dedicated to sourcing sustainable materials. This case study reviews the risk and vulnerabilities of NewGen, with most of its operations outsourced to Chinese suppliers. It examines alternative solutions such as insourcing, re-shoring, diversifying supplier base, changing safety stock amount, and implementing new technologies. This study uses both in-depth interviews with executives and secondary data from the manufacturer.

Paper ID: 73 ANALYZING THE EFFECTS OF COVID-19 ONLINE INSTRUCTION ON INSTRUCTOR EFFECTIVENESS AND LEARNING OUTCOMES

Wednesday, April 5, 2023 10:00 AM Salon A

In March 2020, COVID-19 forced college campuses to close and pivot to offering classes in an online format. For nearly two years, students learned in these alternative modes of instruction. This study analyzes ten years' worth of instructional data from a California business school to determine the effects of online instruction on quality of instruction. The results of this analysis show that online instructional modes were strongly correlated with lower instructor effectiveness, lower student engagement, and lower instructional rigor. These findings have implications for the future of online instruction in higher education.

Paper ID: 74 ETHICS TRAINING FOR SENIOR LAW ENFORCEMENT LEADERS

Friday, April 7, 2023 10:00 AM Salon B

Law enforcement officers and their leaders play a critical role in society. Given the expanding range of responsibilities within the law enforcement officers' duties, it is essential that they be men and women of strong ethical competence. How do police professionals in leadership positions serve effectively while maintaining high standards of ethics? In this study, interviews of law enforcement leaders throughout the United States provided unique insight into the philosophy of the need for ethics training at the executive level. The lack of formalized ethics training, its implications on police leadership, and potential solutions are addressed in this article.

Paper ID: 75 INSTAGRAM

Wednesday, April 5, 2023 10:00 AM Salon C

This case follows the trajectory of a high-tech company that started with a founder's passion who developed an application that had appeal and scalability. As such it is an excellent example of a technological innovation that received VC funding, obtained popular acceptance and growth from an idea to harvest. The company faces numerous external issues from government, societal, and parental concerns to younger generations who are prone to adopt the latest and greatest social media platform.

Paper ID: 78 NATIVITY-BASED DISCRIMINATION: THE EXPERIENCE OF ASIAN AMERICANS IN THE WORKPLACE

Thursday, April 6, 2023 1:00 PM Salon D

Based on perpetual foreigner stereotype, this paper investigates nativity-based discrimination against Asian Americans in the workplace. Using survey data, study 1 demonstrated that U.S.-born Asian Americans were less likely to report experience of discrimination than were foreign-born Asian Americans in getting jobs and promotions. Using experimental methods, study 2 showed that Asian Americans that failed to provide explicit information about their nativity were more likely to be perceived as foreign than were U.S.-born Asian Americans and Whites regardless of nativity condition. Further, the perception of foreignness negatively impacted the evaluator's propensity to hire the candidate.

Paper ID: 81 EXPLORING THE CONSTRAINTS TO LEGAL RECREATIONAL CANNABIS MARKET GROWTH IN THE COUNTY OF LOS ANGELES

Friday, April 7, 2023 10:00 AM Salon B

We examine the constraints to legal recreational cannabis market growth in Los Angeles County, policy reforms to overcome these constraints, and the potential outcomes if constraints are removed. Since the legalization of recreational cannabis across California in 2016, the market has grown substantially. However, limited municipal licensing, high taxes, limited participation by women and minorities, banking and financing issues, and equity ordinances have placed important barriers to entry for new businesses, as well as constraints on market growth. Moreover, long established unlicensed and "grey" operations—which have lower regulatory costs and higher enforcement costs—provide uneven competition for licensed firms.

Paper ID: 82 ANALYSIS OF RIDE-SHARING QUALITY OF SERVICE PRE- AND AMID COVID19 PANDEMIC USING ADVANCED TEXT MINING TECHNIQUES—USA VS INDIA CASE STUDY ACROSS DIFFERENT GENDER AND AGE

Thursday, April 6, 2023 3:00 PM Salon B

To examine factors influenced riders' opinion changes on the quality of ridesharing services after the COVID-19 outbreak, 73,528 tweets from January 1st, 2019 to April 30th, 2022 were collected from Twitter. The Latent Dirichlet Allocation model is used for topic modeling and filters out topics related to ridesharing quality of service (QoS). The Bidirectional Encoder Representations is conducted to determine riders' sentiment (accuracy: 87%). This paper considers topic occurrence and trend change as sentiment time series variables, which have rarely been studied before. The results of this study can contribute to the ridesharing companies' ability to deliver a higher QoS.

Paper ID: 83 A NEW METHOD FOR THE RIDESHARING SERVICE ANALYSIS BASED ON GRAPH CONSTRUCTION — THE USA CASE STUDY ACROSS DIFFERENT AGE AND GENDER GROUPS PRE- AND POST-COVID-19 PANDEMIC

Wednesday, April 5, 2023 10:00 AM Salon D

A multivariable time series deep learning-based method is proposed in this paper where the Latent Dirichlet Allocation is used for modeling the multi-variable time series features, while the Bidirectional Encoder Representations (BERT) is used for extracting sentiments applying on Twitter data. The sentiment of each tweet in each group (in time series) is extracted using BERT (accuracy: 92%). The correlation between sentiment, users' characteristics and time series are analyzed based on the multi-logit model, with 0.000 significant performance. Our methodology considers the change in occurrence, trend of topics, and sentiment time series feature, which have been hardly explored before.

Paper ID: 84 PREVENTIVE REPLACEMENT WITH RANDOM PRODUCTION RATE

Wednesday, April 5, 2023 8:00 AM Salon C

A mathematical model is presented for the optimal timing of preventive replacement of equipment with random production rate. If the equipment is replaced too early, then the future production volume is lost, and if too late, then because of the operation cost and decreasing production rate the operation of the equipment becomes economically ineffective. The life cycle cost and benefit per unit time are random, the net cost has to be minimized. Both expectation and variance are minimized leading to a multi objective programming problem, solved to find the optimal balance between cost and benefit during an operation cycle.

Paper ID: 85 A SEAMLESS ALTERNATIVE METHOD TO SIMULATE AN UNKNOWN DISTRIBUTION MULTIVARIATE DATASET

Wednesday, April 5, 2023 1:00 PM Salon D

Simulation scholars widely refer to the Cholesky decomposition technique and its derivatives to generate datasets from a given correlation/covariance matrix. Apart from the complexity of this technique, the inaccuracy of the output is a matter of this research. Employing linear integer programming (LIP), we introduce an algorithm to solve a system of linear equations using the sample size, the moment of distribution about the means (mean, variance, skew, and kurtosis), and covariances between the original dataset's variables. We generate a new dataset which its properties and sample size perfectly match the original dataset.

Paper ID: 86 MEASURING KNOWLEDGE MANAGEMENT IN SUPPLY CHAINS: A REVIEW AND PROPOSAL

Wednesday, April 5, 2023 10:00 AM Salon G

Knowledge management (KM) in supply chains (SC) involves numerous specific activities such as knowledge creation and application. This study first reviews over 30 different measurements of KM and observes three common problems, which raise a need for creating a new measurement. Driven by knowledge chain theory (KCT), this study proposes measuring KM using nine KCT items and tests this new measurement in the setting of supplier development. Using a survey of SC professionals, this study examines reliability and validity of the new measurement from both buying and supplying firms and shows that the first-order measurement model works better.

Paper ID: 87 UTILIZING UNIVERSITY RESOURCES TO PROMOTE STUDENT WELL-BEING AND STRESS COPING STRATEGIES IN HIGHER EDUCATION

Thursday, April 6, 2023 10:00 AM Salon A

The unprecedented COVID-19 pandemic has been significantly impacting well-being and academic performance of university students in many aspects. This study investigates key factors that co-vary to impact well-being and stress coping strategies of university students during the pandemic semesters and post-pandemic recovery. Preliminary findings are reported on key strategies and university resources that can be better deployed to promote student well-being and academic performance in higher education. The study further develops a data-driven model that articulates a nomological network of interrelationships of key phenomena of higher education. The study contributes to higher education research and administration.

Paper ID: 88 THE SOCIAL MAXIMIZER: WHY THOSE WHO DESIRE THE BEST PURSUE ENTREPRENEURIAL VENTURES WITH A SOCIAL MISSION

Thursday, April 6, 2023 10:00 AM Salon B

Maximizers will seek out more information and options when making decisions based on their desire to find the best. In contrast, satisficers can move forward when they find options that meet their minimum standards without continuing their search to find something better. The current study investigates whether maximizers (vs. satisficers) are more likely to start socially oriented businesses among a sample of U.S. students. Results suggest that maximizers have greater social entrepreneurial intentions than satisficers as they attempt to improve social problems through new business opportunities.

Paper ID: 89 THE IMPACT OF MODEL-BASED SYSTEMS ENGINEERING (MBSE) ON THE FUTURE OF MANUFACTURING AND PROCUREMENT

Friday, April 7, 2023 8:00 AM Salon B

The 2018 National Defense Strategy set forth a vision to modernize the Department of Defense (DoD) engineering approach by developing digital authoritative data sources to replace legacy paper documents.¹ Implementing a Model-based Systems Engineering (MBSE) approach for procurement activities facilitates collaboration on product manufacturing information (PMI) and allows "Digital Twins / Digital Threads" of these authoritative sources to be extracted for supply chain optimization. The Digital Thread incorporates business, contextual, and sensor data from physical systems (or processes) into the virtual system model of the digital twin to facilitate analyses, circumvent manufacturing problems, and develop informed technology roadmaps for DoD suppliers.² This paper will provide insight on how MBSE is changing manufacturing strategies and the impact on procurement of DoD systems.

Paper ID: 91 THE CURRENT AND FUTURE IMPACT OF EMPLOYEE RETENTION IN THE "POST-COVID" JOB MARKET

Thursday, April 6, 2023 10:00 AM Salon C

The COVID-19 pandemic significantly impacted how businesses across the nation must operate to stay competitive in retaining staff members while being 'attractive' to potential new hires. With the current economic trend of the Great Resignation, employees are resigning in masses and moving on to other companies that provide the benefits and conditions employees seek (i.e., increased wages, working remotely, etc.). Replacing staff is expensive, and preventing unwanted turnover is critical for the success of the Department of Defense.¹ Sustainable, inclusive growth requires changing workplace culture to maximize the contributions of all employees.² The presented research will provide insight into the impact of civilian employee retention in the "Post- COVID" Job Market and how the Department of Defense must strategize the way they operate to stay competitive.

Paper ID: 92 COMBINING NLP WITH A SENSEMAKING LAYER AS APPLIED TO OSINT

Thursday, April 6, 2023 8:00 AM Salon C

AI capabilities have made significant advancement in the last decade, particularly around NLP capabilities. In parallel, OSINT has become massive in volume and relatively easy to access and collect. These advancements have given rise to a new class of challenges and opportunities – the ability to make sense of the mountain of information available; to find the signal in the noise. Finding the signal leads to tremendous advantages in decision making, speed of execution and operational support. We will explore the need and impact of a sensemaking layer on top of the mountain of OSINT material.

Paper ID: 93 WHEN SMALL DATA > BIG DATA

Thursday, April 6, 2023 8:00 AM Salon C

It's generally accepted that the big data era began in 2006, fueled by the Hadoop technology. Tremendous gains were realized in data volumes as we rapidly move from terabyte class to petabyte class data stores. This was a blessing and a curse. The next evolution in insight and decision science will be a return to small data – use case specific, high impact, SME curated and vetted data, rapidly delivered and applied in context. Small data can lead to rapid, accurate decision making within context for greater impact and precision.

Paper ID: 94 FUTURE APPLICATIONS OF MICRO BATTERY POWER SOURCES

Friday, April 7, 2023 8:00 AM Salon B

Innovation in extended range electronic platforms, such as unmanned vehicles, has been spearheaded by the miniaturization of microelectronics and high density energy sources through space claim reduction and microstructure resolved electrochemical simulations.^{1,2} The next evolution of micro lithium-ion batteries features high capacity, quick charging power sources in a lightweight, compact envelope that are compatible with MEMS fabrication.³ Mass production of these micro batteries will support the DoD's ability to maximize mission durations of unmanned vehicles with increasingly smaller radar cross sections. This work will present future applications of micro battery power sources in support of battery powered microelectronic platforms in the defense industry.

Paper ID: 95 IMPACT OF COVID ON SMALL BUSINESS

Thursday, April 6, 2023 10:00 AM Salon C

COVID-19 has had a substantial impact on businesses, specifically small businesses¹. The government lockdown was responsible for the temporary and permanent closure of many small businesses. While the economic downturn was widespread, the level of impact varied dependent upon location and industry³. With small businesses accounting for 75% of DoD suppliers, the financial impact of COVID on these businesses will affect the supply chain of parts, pieces, and components (PPC) required to maintain DoD weapon systems². This paper will provide insight into how the DoD will likely be impacted as small businesses attempt to stay operational in the post-pandemic economy.

Paper ID: 96 FACILITATING THE GROWTH OF THE INDUSTRIAL AUTOMATION INDUSTRY

Friday, April 7, 2023 8:00 AM Salon B

Robotics installations saw a significant increase in 2021 with 31% more robotic systems installed and a 2016-2021 CAGR of 11%.¹ Demand for autonomous solutions is expected to continue its upward trajectory with a +7% p.a. through 2025 forcing manufacturing facilities to turn towards automation to remain competitive.² The continued effort to achieve industry 4.0 and IIOT will greatly benefit from the boom in automation. This paper will provide oversight into the factors facilitating this continued growth and discuss strategic decisions that will aid the Department of Defense in rapidly adapting to technological advances in industrial automation.

Paper ID: 98 IMPACT OF INFORMATION SHARING THROUGH HEALTHCARE INFORMATION TECHNOLOGY (HIT): A SYSTEMATIC REVIEW

Thursday, April 6, 2023 3:00 PM Salon B

With accelerated growth in healthcare information technology (HIT) over the past decade, understanding the impact of information sharing across HIT applications is warranted. We conduct a systematic literature review of articles from supply chain, healthcare, and information systems management fields, totaling 5058 articles. Among our final sample of 63 articles, 40% of the articles show that healthcare organizations primarily develop HIT to add value to their in-house operations by using clinical-level applications. 32% of the articles show that information sharing through HIT improves primarily productivity of the organization, and is less focused on improving quality or cost outcomes.

Paper ID: 100 CONSTITUTIONAL RIGHTS AND SUPPORT FOR GUN CONTROL IN CALIFORNIA

Friday, April 7, 2023 10:00 AM Salon B

The First and Second Amendments establish the constitutional rights to free speech and to bear arms in the United States, yet neither of these rights is absolute and considerable friction between these two rights exists. Perceptual research on constitutional rights and gun control can help inform policy. Data from a survey conducted in California in the summer of 2022, will be utilized to test the relationship between agreement with the First and Second Amendments and support for gun control, while controlling for other theoretically relevant variables. The implications of the findings and policy recommendations will be discussed.

Paper ID: 101 EXPLORING THE CONSISTENCY OF BICYCLIST COUNT BETWEEN TYPICAL PERMANENT COUNTER DATA AND EMERGING CROWDSOURCING DATA

Wednesday, April 5, 2023 8:00 AM Salon C

There are typical methods for collecting bicyclist counts like permanent counter count. However, some emerging method utilizing crowdsourced data, (e.g. StreetLight) also benefits from some advantages. This paper aims to conduct a consistency checking between StreetLight count data and permanent counter data. The differences and similarities between the two types of data was evaluated through a number of statistical methods such as T-Test, Wilcoxon Test, Linear Regression R-Squared, Pearson's Correlation Coefficient, Spearman Correlation, and Kendall's Tau Correlation. The results of these tests and measures reveal that StreetLight can be a suitable alternative for permanent counter in terms of consistency.

Paper ID: 102 FAILED BANK ASSET RECOVERY: THE INFLUENCE OF DEPOSITS AND LOAN EXPOSURE

Friday, April 7, 2023 10:00 AM Salon C

This study explores the impact of the balance sheet choices of failed bank on asset recovery rates during the Great Recession. We find asset recovery rates are lower for banks with higher exposure to real estate loans and regions with more volatile housing prices, while relying on brokered deposit. This suggests that asset recovery rates are lower as a consequence of banks' choice to fund loans by brokered deposits, to pursue aggressive growth strategies via riskier loans lent in more volatile locations. Finally, this research will shed valuable lights for policy makers in dealing with assets of failed banks.

Paper ID: 104 STRATEGIC COMMERCIALIZATION OF MIGRANT

Thursday, April 6, 2023 1:00 PM Salon B

With immense challenges to rising poverty and inequality, migrants present an opportunity for strategic commercialization. This study examines the strategic commercialization of migrants in Europe based on a literature review and 27 interviews. According to the respondents, migrants' flow is facilitated by a network of governmental and private constituents who invest in victims of economic, social, political, and environmental calamities. Once the victims are loaded with debt and compounded interest in their country to pay for their journey, they are pushed out of their habitual setting and lured to a predetermined destination that preconditions them for involuntary servitude.

Paper ID: 105 INSTITUTIONAL INVESTORS AND BANK RISK EXPOSURE: THE ROLE OF OWNERSHIP CONCENTRATION ON CAMELS AND INVERTED Z-SCORE

Friday, April 7, 2023 10:00 AM Salon C

We study how bank risk exposure – measured by CAMELS indicators and inverted Z-score – is shaped by various types of institutional investors: active vs. passive, quasi-indexer and dedicated vs. transient, and long-term vs. short-term. We find lower risk exposure for banks with larger institutional ownership but more importantly, concentrated ownership among active, quasi-indexer and dedicated, and long-term institutions. In contrast, we find higher risk exposure for banks with concentrated ownership among passive, transient and short-term institutions. We also provide further evidence about the statistically and economically significant impact of various types of institutions on all thirteen CAMELS indicators.

Paper ID: 108 USING A LONGITUDINAL APPROACH TO EXAMINE RELATIONSHIPS BETWEEN SIX SIGMA AND CORPORATE SOCIAL RESPONSIBILITY (CSR) ON FINANCIAL PERFORMANCE OF FINANCE SERVICES INDUSTRY

Wednesday, April 5, 2023 3:00 PM Salon G

We investigate the moderating effect of Six Sigma programs on the relationship between CSR and firm performance in the finance services industry (e.g., banking and insurance). Drawing upon both CSR and Six Sigma literature, we propose and test several hypotheses applying the panel analysis. Our results show that Six Sigma and CSR enhance the firm performance and that the interaction between Six Sigma and CSR also improve the firm performance. This study is among the first to empirically test the effect of CSR on firm performance by explicitly considering how Six Sigma applications can moderate the efficacy of this relationship.

Paper ID: 110 THE ADVERTISING IMPLICATIONS OF THE DYNAMICS IN MILLENNIALS' EVALUATIVE CRITERIA: COMPARING PRINT, BROADCAST, AND THE INTERNET

Wednesday, April 5, 2023 3:00 PM Salon C

Advertisers are spending huge sums of money on print, broadcast, and internet media to reach Millennials. Nevertheless, their effort to reach the cohort has been frustrated by rapidly changing communication technologies, the pandemic, and the shift in their media habits. Based on online group chats, complemented by the Delphi method, the study explores Millennials' evaluative criteria in choosing print, broadcast, and internet media. The findings suggest that Millennials are preoccupied with access, control, content, and streaming options. Their preferences are influenced by convenience, availability of content, and time shift issues. Keywords: Millennials' changing media habits, Millennials' media choice criteria

Paper ID: 113 SERVING THE UNDERSERVED: IMPACT OF THE LOW-INCOME DESIGNATION ON US CREDIT UNION FINANCIAL PERFORMANCE

Friday, April 7, 2023 10:00 AM Salon C

The low-income designation, which provides regulatory waivers and operational assistance to credit unions who serve low-income members, is one type of US governmental program promoting financial inclusion. Despite the increasing occurrence of low-income designation, the impact on credit union financial performance is unclear. The present study employs regression analysis using panel data to assess the impact of low-income designation. The study finds the low-income designation and usage of attendant regulatory benefits are positively associated with credit union financial performance. These findings provide insights for credit union practitioners and regulatory agencies regarding the sustainability of credit unions who serve the underserved.

Paper ID: 114 INTEGRATING WORKFORCE DEVELOPMENT INTO BUSINESS ANALYTICS CURRICULUM DESIGN AT A MINORITY-SERVING UNIVERSITY

Friday, April 7, 2023 10:00 AM Salon A

In today's technologically pervasive workplaces, employers immediately demand analytical and problem-solving skills. This work will present the design and implementation of a workforce-oriented curriculum design – "Using NVivo to Analyze LinkedIn Job Ads". Informed by project-based learning studies and workforce development practices, this course design allows students to build their analytical and digital skills while enhancing their knowledge about the job market demands for graduates of their majors. Workshop attendees will learn about program design, students' reflections, implementation challenges, and strategies while reflecting on student learning goals and the potential opportunities for integrating workforce development in their teaching.

Paper ID: 115 EXPLORATION OF THE IMPACTS OF TRANSPORTATION AND SOCIOECONOMIC FACTORS ON PUBLIC HEALTH IN US CITIES

Thursday, April 6, 2023 10:00 AM Salon D

The exploration of transportation and socioeconomic factors on public health plays a crucial role in the development of comprehensive city planning. The data used for this study include transportation, socioeconomic, and health factors gathered for 69 cities in the United States. This data contains various variables such as transportation facilities, populations, income levels, land area, and health indicator rates. A variable importance ranking was employed using random forest method prior to discovering the linear associations between the independent and dependent variables. The results and findings of this paper are expected to produce more insights to transportation agencies and practitioners.

Paper ID: 116 USING PROBLEM-BASED LEARNING (PBL) CONTINUUM TO TEACH SOFT SKILLS IN THE GOVERNMENTAL ACCOUNTING COURSE

Wednesday, April 5, 2023 8:00 AM Salon A

Over several decades accounting professional organizations have advocated the need for business/ accounting students entering their profession to be able to communicate, work on teams, and perform analytical thinking (i.e., technical and soft skills). To integrate these skills into the Governmental Accounting course, six continuum PBL approaches (e.g., problem-initiated learning) have been utilized at several universities in different regions of the country. The PBL projects/cases were created/located using the Backward Design method (e.g., starting with the accounting professional skill sets). One or more of these teaching approaches can be used to assist students in learning.

Paper ID: 118 HUMAN CAPITAL, R&D-MANUFACTURING INTEGRATION, AND PERFORMANCE: EVIDENCE FROM TAIWAN TECHNOLOGY-BASED YOUNG FIRMS, 2002–2016

Thursday, April 6, 2023 10:00 AM Salon B

This paper explores the impact of young technology-based firms' human capital and organizational demography on their early-stage performance. The empirical analysis relates to a sample of 152 young firms and 1,049 entrepreneurial team members. The study provides evidence of two factors, namely, human capital and organizational demography. The human capital of team members with prior background affiliation, advanced professional education, and global work experiences help a firm's performance. Furthermore, our study identified three characteristics of organizational demography: functional diversity, the combination of chairman and C.E.O. positions, and R&D-manufacturing integration that could explain the impact on young firms' performance.

Paper ID: 119 TRANSACTION-BASED LENDING AND REAL EARNINGS MANAGEMENT

Friday, April 7, 2023 10:00 AM Salon C

This study examines how lenders alter their behavior when faced with real earnings management (REM). We use the incremental R-square approach as in Kim and Kross (2005). As REM primarily affects the Income Statement, we find that lenders rely less on Income Statement ratios in making credit decisions in the presence of REM; however, they do not alter their reliance on Balance Sheet ratios when faced with REM. The findings of this paper could also help practitioners (borrowers and lenders) to understand how REM affects credit decisions.

Paper ID: 121 THE AMERICAN DREAM: STARTING AND GROWING A BUSINESS AS AN IMMIGRANT

Thursday, April 6, 2023 8:00 AM Salon B

This case details Lorena Cantarovic's experiences with starting and growing her award-winning restaurants: Maria Empanada. Lorena (an Argentinian immigrant) came to Colorado to learn English and stayed. Homesick for her childhood empanadas, she made empanadas and sold them to her friends. Her first break came when a caterer placed a large order for empanadas. To meet increasing demand, she opened several restaurants. Lorena addressed the pandemic by closing some restaurants and changing her business model. The case provides insights into issues immigrants might encounter when starting and growing businesses in dynamic environments while maintaining the values of their homeland cultures.

Paper ID: 122 EXPLORATION OF THE INTERACTION MECHANISM BETWEEN THE CHINESE GOVERNMENT AND GENERAL PUBLIC OVER SOCIAL MEDIA, REGARDING CHINA'S SELF-IMAGE AND SINO-US RELATIONSHIP

Thursday, April 6, 2023 3:00 PM Salon D

This study aims at exploring the mechanism of interaction over social media between Chinese government and Chinese public on China's self-image and the relationship between China and US. This study develops a metric to measure the effect of government's agenda setting on public opinions. It constructs a preliminary model for the patterns of Chinese government's agenda setting on social media and Chinese public's reactions to the government's agenda setting efforts. This model takes into account social media infrastructure, economic development level, user education level, and other factors that could moderate or mediate the above interactions between government and the public.

Paper ID: 123 ESG DISCLOSURES IN THE TECHNOLOGY SECTOR

Wednesday, April 5, 2023 3:00 PM Salon G

The technology sector is exposed to ESG risks associated with direct and indirect operations, internal and external stakeholders, and legal and regulatory constraints. The recent trend in supply chain diversification also brings new challenges. Mitigating ESG risk could help improve brand value and avoid unnecessary cost increases stemming from supply chain disruptions, reputation damage, regulatory fines, or litigation. However, a review of Bloomberg ESG disclosure data shows that technology firms do not have a high ESG disclosure in contrast to other industries. This study analyzes ESG disclosure effects on ESG risks and the firm's profitability and supply chain agility.

Paper ID: 124 THE IMPACT OF AUDIT REPORTS' CRITICAL AUDIT MATTERS REQUIREMENT ON AUDIT REPORT LAGS AND AUDIT FEES

Wednesday, April 5, 2023 1:00 PM Salon A

The impact of the Public Company Accounting Oversight Board's (PCAOB) audit standard that requires the disclosure of Critical Audit Matters (CAM) in the audit report of public filers has not been widely investigated in the literature. We provide empirical evidence on the relationship between CAM disclosures and audit report lags as well as audit fees. We find that a larger number of CAM disclosures reported is associated with longer audit report lags and higher audit fees, which suggests that the auditors may undertake a larger workload when undertaking an audit that results in a larger number of CAM disclosures.

Paper ID: 127 COVID AND EARLY CHILD EDUCATION: CASE STUDIES OF INNOVATIVE PRE-SCHOOL APPROACHES DURING THE PANDEMIC WITH SUGGESTED TAX SUBSIDIES

Wednesday, April 5, 2023 10:00 AM Salon A

Early childhood programs hold a firm anchor in the comprehensive education landscape. During the COVID-19 pandemic the federal Head Start program was shuttered nationwide as were many informal preschool facilities. Meanwhile, wealthier parents used unique neighborhood "learning pods." This paper will examine these models along with the informal care of family or friends. A cost-and-benefit analysis will focus on the disparate impacts on the various stakeholder groups. In addition, the paper discusses pertinent tax proposals including a refundable dependent care credit, a reinstated per child credit for young children, a generous earned income credit, and an expanded employer leave credit.

Paper ID: 129 WARRANTY AND CONSUMER QUALITY PERCEPTION STUDIES IN THE REMANUFACTURING INDUSTRY

Wednesday, April 5, 2023 3:00 PM Salon G

We formulate a two-period model to study two warranty offering strategies for a manufacturer who produces and sells a new product in the first period and both new and remanufactured products in the second period. The product quality is unobservable to consumers before purchase. Consumers make purchase decisions based on their perception of product quality, which is based on quality signaling information such as product warranty and the manufacturer's quality reputation. Under this setting, the manufacturer chooses to offer one of the two warranty strategies. Keywords: warranties, remanufacturing, quality perception, optimization

Paper ID: 130 USING SPREADSHEET TO SIMULATE BASIC STOCHASTIC MODELS

Thursday, April 6, 2023 10:00 AM Salon D

This paper presents a basic approach for illustrating complex probability models using spreadsheets as a simulation tool. We will illustrate this approach by using three popular probability examples. Our targeted audience is practitioners in business professions and those with less rigorous training in computational mathematics. Modeling and Simulation are well known as efficient and effective alternatives to analytical methods in solving many businesses, engineering, and scientific problems. These models are easily understood and can be tweaked for further exploration, and more importantly, they are risk-free, and cost-effective in terms of experimentations of "What-If" analysis. . . .

Paper ID: 132 FIGHTING COLLEGE ATTRITION THROUGH TIMELY INTERVENTIONS AND MACHINE LEARNING

Wednesday, April 5, 2023 1:00 PM Salon D

In this work, we explored the many causes of attrition and created models to predict students at risk of discontinuing their education. The objective of our study is to help administrators identify students at risk of attrition, so they may intervene and keep students on track to obtain their degrees. We utilized machine learning classification methods to build CatBoost, LightGBM, XGBoost, and Random Forest models, designed to assign a probability of attrition to each student, based on demographic, pre-collegiate, and academic features. We then evaluated the performance and appropriateness of each model to determine how it applies to administrators.

Paper ID: 133 EXAMINATION ASSOCIATION OF ALTERNATIVE CRASH TYPES IN CALIFORNIA

Thursday, April 6, 2023 3:00 PM Salon C

In the current traffic safety, considerably less studies have been dedicated to evaluating the association of different crash types. This paper aims to assess the fill the gap using seven city-level crash types including alcohol, bicyclists, hit and run, nighttime, pedestrians, speed, and motorcyclists. The goal is achieved through a Pearson's correlation coefficient test along with k-means clustering algorithm. The findings of the paper can assist city planners, policymakers, and pertinent transportation and local agencies in improving safety levels and establishing adequate mitigation measures.

Paper ID: 134 CREDIT DERIVATIVES AND CORPORATE ESG PERFORMANCE

Thursday, April 6, 2023 8:00 AM Salon G

Credit default swap trading has a positive effect on the firm's ESG performance measured by ESG ratings. This effect is concentrated on ESG strengths rather than the concerns. The proposed empirical connection remains valid with different endogeneity controlling methodologies, model specifications, and ESG performance measures. We find the effect is more pronounced with firms that have higher debt dependence. Besides, CDS trading improves the ESG performance more for firms with stronger bank relations and more restrictive covenants. Our findings reveal the real effects of credit derivative trading on firms' ESG performance and rating.

Paper ID: 135 THE STATE OF INFORMATION SYSTEMS CURRICULA ACCORDING TO IS2020 COMPETENCIES FRAMEWORK

Friday, April 7, 2023 10:00 AM Salon A

To address the needs of future Information Systems (IS) professionals, the current IS2020 Task Force developed a competency-based model for undergraduate programs. The model focuses on the graduate's ability to apply knowledge, skills, and dispositions to effectively perform their work. Overall, IS2020 identifies nine competency areas in six competency realms. This study collected 2,172 core courses offered by 343 undergraduate IS programs in the U.S. The title and description of the courses were mapped to the IS2020's nine competency areas. The results present a panoramic snapshot of the IS core offered in the nation from the perspective of IS competencies.

Paper ID: 136 THE ATTITUDES TOWARD ARTIFICIAL INTELLIGENT APPLICATIONS: AN INVESTIGATION BASED ON INNOVATION RESISTANCE THEORY

Wednesday, April 5, 2023 8:00 AM Salon B

Artificial intelligence (AI) has been widely used by companies in their quest for digital transformation. Numerous low-level jobs have been replaced by AI because of its strong ability to handle repetitive tasks; however, this replacement process has increased new graduates' chances of unemployment. Based on the innovation resistance theory, we investigated new graduates' attitude toward competition with AI in the job market. The findings of this study might serve as a reference for human resources staff in organizations that have implemented AI to determine whether new graduates are a good fit for the company.

Paper ID: 139 COMPARING CORRELATION BETWEEN IMAGE RESOLUTION AND MASK R-CNN MODEL TRAINING TO PREDICT ROAD STRESS INSTANCES

Wednesday, April 5, 2023 8:00 AM Salon C

Automated detection allows for efficient recognition of road stress. Automated detection of road stress in this study - will be done using a Mask Regional-Convolutional Neural Network (Mask R-CNN) backbone model to train a road stress detection algorithm. The same Mask R-CNN model will be used to predict road stress instances on public roads in three different image resolutions. The image resolutions which are to be compared are 720p, 1080p, and 4k. The authors seek to determine which of the three image resolutions would serve as the most accurate basis for road stress prediction using a Mask R-CNN backbone model.

Paper ID: 142 IDENTIFICATION OF FACTORS ASSOCIATED WITH PUBLIC HEALTH WORKFORCE RESILIENCE

Wednesday, April 5, 2023 3:00 PM Salon G

The purpose is to identify the resilience factors of public health workers. During disasters, public health workers play a critical role in protecting public health. When not managed effectively, poor performance and thus inferior public health could be observed due to high levels of stress or elevated adversity in the workplace. To understand the influencing factors of public health worker resilience, we conducted a comprehensive and systematic literature review. This paper reports the resilience factors, categorizes whether they are individual characteristics or external environmental factors and suggests the corresponding interventions that could enhance the resilience of the public health workforce.

Paper ID: 143 CARS FOR CHARITY: IS IT A SCAM, OR, IS IT A SCAM?

Thursday, April 6, 2023 3:00 PM Salon A

Anybody remember the tax shelter industry of the early nineteen-eighties? Well there is at least one current industry related to tax benefits, real or not real. That industry involves contributions of vehicles and similar properties to charities. Aggressive advertising programs promise tax benefits to contributors who only benefit if they itemize their deductions. Less than 15 percent of individual taxpayer returns report itemized deductions and for-profit industries usually benefit from fees for towing, auctioning and otherwise facilitating the related transactions.

Paper ID: 144 MANAGEMENT EMOTION AND FIRMS' IT INVESTMENT DECISIONS

Wednesday, April 5, 2023 3:00 PM Salon D

Firm's strategic IT investment is an investment decision managers make regarding strategically deploying and developing IT assets and capabilities. It is fundamental in the shaping of their information systems. This paper investigated the impacts of management emotion on firms' strategic IT investments. Based on 175 annual reports of 35 companies from retail industry in a 6-year period (i.e., 2016-2021 fiscal year), we applied sentiment analysis to retrieve emotion tones embedded in each report and analyzed their relationship with firms' strategic IT spendings in the following years. Our results show that positive management emotion promotes firm's IT investments

Paper ID: 145 USING NON-ORIENTED EQUILIBRIUM EFFICIENT FRONTIER DEA APPROACH TO EVALUATE FIXED-SUM-OUTPUTS DMUS

Wednesday, April 5, 2023 8:00 AM Salon G

Equilibrium efficient frontier DEA approaches are developed to measure efficiency levels of decision-making units with fixed-sum outputs. However, present approaches in literature only evaluate either input or output efficiency. In this paper, we propose a new non-oriented approach which considers input excesses and output shortfalls jointly to assess the DMUs. This study obtain overall and discriminative efficiency results to assist actual managerial decisions. We further employ a Nash bargaining game to optimize the evaluation results. Finally, we illustrate this approach by a numerical example and apply it to 30 companies in the vehicle industry. Its performance surpass benchmarks in literature.

Paper ID: 146 THE RELATIONSHIPS BETWEEN BOND YIELDS, THE CHICAGO BOARD OPTIONS EXCHANGE VOLATILITY INDEX (VIX) AND FIRM VALUATION: A STATISTICAL ANALYSIS

Friday, April 7, 2023 8:00 AM Salon C

The CBOE Volatility Index (VIX) is calculated using current options prices, and since options are short-lived instruments, the prices incorporate some expectation of market volatility. In this paper, we investigate the statistical relationships between bond yields, VIX and valuation of firms. This statistical analysis reveals that increase in bond yields and CBOE Volatility Index (VIX) have a negative impact upon the firm's intrinsic value. The traditional 60/40 portfolio model (a mix of 60% stocks and 40% bonds) cannot be used as a hedge against the decline in stock prices during this "fighting inflation" period of the Federal Reserve's Monetary Policy.

Paper ID: 147 HOW DO USERS ENGAGE ON A PRIVACY-BASED SOCIAL NETWORKING APP?

Wednesday, April 5, 2023 1:00 PM Salon C

On social networks, users have different ways to interact with each other and engage. If people's identity is hidden or they do not self-disclose their information, engagement becomes difficult. This study proposes a research model to investigate triple trade-off between anonymity, disclosure, and privacy on a new privacy-based social network application. We used a combination of survey method (at two stages) and actual mobile app data to test the proposed model. Results indicate a negative relationship between anonymity and privacy concern. Surprisingly while perception of engagement is increased with anonymity, actual engagement is negatively influenced by anonymity.

Paper ID: 148 ASSESSING PIONEERING ORIENTATION THROUGH EMBEDDEDNESS IN QUICK RESPONSE SUPPLY CHAINS

Wednesday, April 5, 2023 3:00 PM Salon A

This paper aims to examine how embeddedness interacts with factors affecting pioneering orientation in quick response supply chains. A novel research model is developed which comprises 7 constructs and 7 research hypotheses, with embeddedness as a mediating construct. The hypotheses are tested on data collected from 266 major manufacturing firms in Taiwan, using structural equation modeling. The findings of the study provide useful insights into how supply chain members should reinforce localization, sensing capability, supply chain flatness, top management support and local-based demand so as to improve their embeddedness and in turn enhance pioneering orientation in quick response supply chains.

Paper ID: 149 EXPLORING HOW SENSING CAPABILITY AFFECT SUPPLY CHAIN QUALITY MANAGEMENT

Wednesday, April 5, 2023 3:00 PM Salon A

This paper presents a research model to examine factors influencing supply chain quality management. The model comprises four research hypotheses with five constructs. The constructs are measured by well-supported measures in the literature. Data are collected from 269 manufacturing firms that are among the top 2500 Taiwanese manufacturing firms listed by Business Weekly. The findings of the study provide useful insights into how supply chain members should reinforce supply chain agility, data synchronization and judgmental adjustments so as to improve their sensing capability and in turn enhance supply chain quality management for the supply chain as a whole.

Paper ID: 151 MANAGING SUPPLY CHAINS UNDER IMMINENT DELAYS

Wednesday, April 5, 2023 1:00 PM Salon D

Current research on risk management in supply chains primarily deal with managing operational risks, such as uncertainty in demand, uncertainties in supply lead times, and the like. Disruptive risks, such as the ones caused by natural disasters, labor disputes, terrorism, and international trade disputes are less studied. "Uncertainty and fear grow over Brexit", "China's Covid Crisis Threatens Global Supply Chains" are common newspaper headlines of recent years. This presentation will update the ongoing study that aims to develop quantitative tools based on linear programming to assist management decision-making when the delays are imminent or can be predicted with reasonable confidence.

Paper ID: 152 COMBINING MACHINE LEARNING AND MILLIMETER WAVE TECHNOLOGY DEVICES TO BUILD AN ARTIFICIAL INTELLIGENCE WARNING SYSTEM FOR TARGETED TEMPERATURE MANAGEMENT PATIENTS

Wednesday, April 5, 2023 8:00 AM Salon B

Targeted temperature management (TTM) is a clinical technology that has recently been promoted. It maintains the temperature of patients with cardiac arrest (and who have been rescued) at 32°C–34°C to lower the rate of cerebral oxygen metabolism in the patients, stabilizing their medical conditions. because of COVID-19, contactless healthcare and automatic systems have become increasingly critical. This study used millimeter wave technology, a non-invasive technique, to collect patients' physiological data to be fully informed about their physiological statuses. In addition to establishing a model for predicting TTM effectiveness, this study also verified the data collection effectiveness of millimeter wave technology.

Paper ID: 153 A STUDY OF THE GREEN CATERING MANAGEMENT STRATEGY AND CORPORATE SOCIAL RESPONSIBILITY IN TAIWAN

Wednesday, April 5, 2023 1:00 PM Salon B

Corporate ethics focuses on the individual decision-making and activities of employees, while corporate social responsibility is the moral behavior expressed at the corporate quality. Consumers have more diversified catering choices, green catering pays more attention to social responsibility when operating, competitive, but also integrating social factors, environmental protection, resource conservation, health of consumers' meals, and the quality of service is also improved customers values. This study takes Taiwanese vegetable restaurants as a case study, analyzes smallholders to promote CSR from new thinking from table to origin, staff selection, and training to enhance competitive advantage. Keywords: social responsibility, green catering, health, staff, competitive advantage

Paper ID: 154 AN ANALYSIS OF RIDESHARING TRIP TIME PRE- AND POST-COVID-19 PANDEMIC USING ADVANCE TEXT MINING TECHNIQUE – THE USA VS INDIAN CASE STUDY ACROSS DIFFERENT AGE AND GENDER GROUPS

Thursday, April 6, 2023 10:00 AM Salon G

To examine the views of users on the change in ridesharing trip time in the USA and India, 63,800 tweets from 1 January 2019 to 30 April 2022 were collected, specifying age, gender, and country. The Linear Discriminant Analysis is used for topic modeling. The Bidirectional Encoder Representation for the Transformer model is used for extracting the users' sentiment (87% accuracy). The correlation of sentiment with users' characteristics, country, and pandemic are analyzed based on the multi-logit model (sig. = 0.03).

Paper ID: 155 BUILDING CULTURAL IQ AND CULTURAL SENSITIVITY: A SEMESTER AT SEA TEACHING EXPERIENCE

Friday, April 7, 2023 8:00 AM Salon A

During the Semester at Sea (SAS) experience, faculty have the opportunity to serve as in the following roles: as trip liaisons, leading various student programs, while at port; as a teacher of 3 different academic courses during the semester, and leader of 3 different field classes in various countries related to the courses taught. The SAS experience is a learning opportunity for both students and faculty, and even the most seasoned travelers, expatriates and Fulbright Scholars can further build their cultural IQ and cultural sensitivity while exploring the world—approximately 11 countries, 11 cities and 3 or 4 continents.

Paper ID: 156 RIDESHARING COST PRE- AND POST-COVID-19 PANDEMIC

Thursday, April 6, 2023 10:00 AM Salon G

Post-pandemic, ridesharing provides a lot of discount policies to face the influence of the pandemic, but those policies have different effects in various countries and users group. To examine the views of different users on the change in ridesharing prices in the USA and India, 63800 tweets from January 2019 to April 2022 were collected. The Linear Discriminant Analysis is used for topic modeling and the Bidirectional Encoder Representation model is used for extracting the users' sentiment (81% accuracy). The results show that post-pandemic and in India, the sentiment is more positive, and the females are more positive than males.

Paper ID: 157 THE INFLUENCE OF DISTRACTIONS, ACCOMPANIMENT TYPE, VEHICLE TYPE, AND STRESS ON PEDESTRIANS' WAITING TIME: APPLICATION OF IMMERSIVE VIRTUAL REALITY (IVR) AND ARTIFICIAL INTELLIGENCE

Thursday, April 6, 2023 3:00 PM Salon C

This study aimed to test the influence of different distractors, vehicle types, and stress on pedestrian waiting time at intersections. The data was obtained through simulation adopting immersive virtual reality, in which 32 combinations of possible environments were tested. Distractors were visual and phone distractions, and accompaniment by a kid. These were tested in environments with different traffic volumes and vehicle types, either traditional or automated vehicles (AVs). Regularized Gradient Boosting Tree and Restricted Boltzmann Machine techniques were used to predict the waiting time. Associations between the predicted waiting time and other variables were analyzed using a Cox Proportional-Hazards model.

Paper ID: 158 STOCHASTIC NOTIFICATION SCHEDULING WITH PUSH CONSTRAINTS

Thursday, April 6, 2023 3:00 PM Salon B

In this research we address the push notification scheduling problem in which the user is allowed to specify a limited number of times for receiving push notifications. The user can also specify blackout time periods. The objective of this optimization problem is to minimize the total message (job) waiting time before a batch of messages is released/pushed to the user. How to allocate the restricted number of releases during the allowed time periods has a significant impact on the quality of service measured by the timeliness of the delivery of the jobs under certain user behavior and energy constraints.

Paper ID: 160 EPISTEMIC INJUSTICE IN BIG TECH: KNOWLEDGE PRODUCTION, REPRESENTATION, AND INVISIBILITY

Wednesday, April 5, 2023 3:00 PM Salon B

One important role for businesses, employees, and other stakeholders is as epistemic agents who know things, circulate knowledge, and are recognized as knowers. In addition to practical significance, this role also has moral valence. I build on the work on epistemic virtues and vices in business, bringing in more of the burgeoning philosophical literature on epistemic injustice. I then connect this theory to voluminous literature critiquing big data and big tech—spaces where knowledge practices are particularly helpful in illustrating the importance of epistemic justice and organizational accountability. Keywords: epistemology, epistemic injustice, epistemic virtues, big data, ethical theory, technology sector

Paper ID: 161 TESTING THE RELIABILITY OF FUEL DISTRIBUTION TRUCKS USING SURVIVAL ANALYSIS

Thursday, April 6, 2023 8:00 AM Salon C

In recent events, fuel supply and distribution has proven to be a large contributor to the success or failure of a military operation in response to a contingency. Any future near-peer conflict will stress the logistics supply chain and require fully operational vehicles to be ready and fulfill primary mission sets they support. Reliability of the fuel distribution trucks is crucial to meeting those mission sets in aerial operations globally. Utilizing the historical maintenance logs, including failure and non-failure data, to perform survival analyses of the fuel distribution trucks may assist in further improving readiness therates of the fleet.

Paper ID: 162 STRATEGIC FRAMINGS BETWEEN RURAL & METRO REGIONAL GOVERNMENTS IN THE PACIFIC NORTHWEST: A DYNAMIC CAPABILITIES PERSPECTIVE

Thursday, April 6, 2023 1:00 PM Salon B

This study extends current work on strategic framing into strategic decision making associated with regional economic development. Regional governments deploy strategic management steps including interpretation of internal/external task environments, choosing possible strategies, and implementing them towards advancing the interests of their communities. Viewing their strategies through a dynamic capabilities perspective, we analyze the Comprehensive Economic Development Strategy documents of counties in the Pacific Northwest. We identify strategic framing differences between metropolitan and rural regional decision makers in Washington, Oregon, Idaho, Northern California and Southern Alaska and discuss implications for business development in the respective regions.

Paper ID: 163 A STUDY OF DISC PERSONALITY TRAIT, LEADERSHIP EFFECTIVENESS AND JOB SATISFACTION OF HEALTH CARE WORKERS

Thursday, April 6, 2023 10:00 AM Salon B

This study uniquely explores the effects of Dominance, Influence, Steadiness, and Conscientiousness (DISC) personality traits on the relationships between perceived leadership style, leader effectiveness, and job satisfaction. The sample consisted of 248 healthcare workers. The findings for employees with D and C dominant personality traits demonstrated that perceived leadership effectiveness fully mediated the relationship between leadership style and job satisfaction ($p < 0.01$, path-coefficient 0.442). The results for employees with S and I dominant personality traits demonstrated a reversed path. Organizations should consider the specific dominant personality trait elements when developing strategies to nurture increased job satisfaction and overall leadership effectiveness.

Paper ID: 164 THE IMPORTANCE OF DISTRIBUTED JUDGMENT IN BUILDING PREDICTIVE MACHINE-LEARNING MODELS

Wednesday, April 5, 2023 8:00 AM Salon B

AI/ML model-building process is generally considered a well-structured task wherein judgment is needed towards the end of the pipeline after predictions are made. We believe that the role of judgment is grossly underestimated in the model-building process and argue that judgment is an important component throughout the different stages of the model-building process. We show that various judgments are needed in each stage of the model-building process (input data-model building and validation, prediction, and decision). In addition, we explain the effects of poor judgment during the upstream activities in model building on the downstream activities of making prediction and decisions.

Paper ID: 165 DO PEOPLE REACT TO SENTIMENT DIFFERENTLY OVER TIME?

Wednesday, April 5, 2023 1:00 PM Salon C

Previous research shows that sentiment of text influences its diffusion in social media. Each emotion can be located on a three-dimensional space formed by dimensions of valence (positive-negative), arousal (passive / calm-active / excited), and tension (tense-relaxed). While previous research has investigated the effect of different dimensions of emotion on information diffusion in social media, it is unclear whether people's reaction to sentiment is constant, or it changes over time. We propose a research model and test it using data collected from Twitter.

Paper ID: 166 CLOSET-BUILDING VERSUS MINIMALISM: SELLING FEWER, BETTER PRODUCTS TO FASHION SENSITIVE CUSTOMERS

Thursday, April 6, 2023 10:00 AM Salon G

Fashion sellers are sometimes critiqued for selling products with low durability, resulting in waste. Blame is also directed at consumers, who purchase new fashions despite having accumulated a closet full of prior fashions. The "slow fashion" movement encourages sellers to produce more durable products, but doing so implies added costs and potentially less frequent consumer purchases. We focus on the joint product-durability and pricing decisions of a firm that sells new fashion-product varieties over time. While slow-fashion, calling for durable products and infrequent purchasing, can be viewed from a philosophical perspective, our analyses economically bridge the slow- versus fast-fashion segments.

Paper ID: 167 DETECTING FAKE NEWS: HOW DO GOVERNMENTS FOOL US?

Wednesday, April 5, 2023 1:00 PM Salon C

People use social media to gather information about many things including events, people, and news. False information, or "fake news," has been present for as long as humans have had the ability to communicate with each other. Social media companies are working to implement systems to identify and combat it. These efforts can be challenged when dealing with coordinated campaigns by governments to manipulate the portrayal image of events. In this study, we investigate the events following the death of a 22-year-old Iranian girl while in police custody that embarked national and international outrage.

Paper ID: 168 SOURCE OF PERFORMANCE INFORMATION AND EMPLOYEES' SUPPORT FOR TELEWORK POLICY INITIATIVES – A SURVEY EXPERIMENT

Thursday, April 6, 2023 1:00 PM Salon D

Our study uses survey experiment to test the effects of two sources of performance information – citizens and public managers on employees' support for telework working policy changes. We hypothesize that employees are more likely to support telework policy change if given internal/positive performance information. We use survey experiments on public sector employee samples from both Hong Kong and the United States. The study offers evidence on whether source of performance information affects public employees' support for organizational policy initiatives. The study also provide valuable evidence to public managers and help them communicate and implement remote work policies successfully.

Paper ID: 170 AN EXAMINATION OF THE ASSOCIATION OF GRIT WITH PERFORMANCE ENROLLED IN IN-PERSON VERSUS ONLINE CLASSES OF A FUNDAMENTALS OF FINANCIAL ACCOUNTING COURSE

Wednesday, April 5, 2023 8:00 AM Salon A

This study investigates the role grit may play in the achievement of students in a fundamentals of financial accounting course and whether grit effects differ depending upon whether the students receive instruction via in-person or online zoom classes. Grit is generally thought of as a non-cognitive trait exhibited by individuals allowing them to work strenuously toward challenges and to maintain effort and interest over time. Achievement in accounting may be associated with grit as accounting presents a combination of concepts, processes, and mathematical challenges requiring persistent effort and practice. Investigating these associations can provide insights that can enhance student learning.

Paper ID: 172 CONSUMERS' CHOICE BETWEEN THE COMPANY'S SELF-OWNED AND THIRD-PARTY PLATFORM ONLINE STORES

Thursday, April 6, 2023 1:00 PM Salon A

In the e-commerce world, many companies have stores in third-party online platforms (TOS) and a self-owned online store (SOS) on their own websites. Although SOS and TOS are operated by the same company, consumers' perception of them is different. This paper examines the influence of platform reputation, risk attitude, four dimensions of perceived risk and trust tendency on consumers' store choice between a SOS and a TOS. The results showed that platform reputation and risk attitude had a significant effect on product performance risk and social risk, which significantly affected consumers' trust tendency and their choice between SOS and TOS.

Paper ID: 174 INFORMATION SECURITY POLICY COMPLIANCE BEHAVIOR OF IT PROFESSIONALS

Wednesday, April 5, 2023 3:00 PM Salon D

Based on their occupation, information technology (IT) professionals are directly involved in compliance with information security policies (ISP) within organizations. Drawing upon the Theory of Reasoned Action (TRA) and General Deterrence Theory (GDT), this study investigates the factors that influence ISP compliance behavior of IT professionals. Our hypotheses were tested using survey data from 324 IT professionals in the US, responses were collected through Amazon Mechanical-Turk. Our results show that organizational commitment, normative beliefs, risk, and perceived cost of non-compliance significantly impact ISP compliance of IT professionals. The study advances the literature on ISP compliance and IT workforce management.

Paper ID: 175 AN EXAMINATION INTO STANDARDIZED PHYSICAL FITNESS ASSESSMENTS ACROSS AIR FORCE SPECIALTY CODES

Thursday, April 6, 2023 8:00 AM Salon C

It is well known that performance measurement leads an organization. One of individual performance assessments is a physical fitness test in military. The physical fitness test in the United States Air Force includes three measures such as sit-ups, push-ups, and running. An outcome can be excellent, satisfactory or unsatisfactory. We compare fitness test results among three distinctive groups such as medical, security, and personnel specialties. Based on insights from the results, we propose improvement directions within the total quality management perspective.

Paper ID: 176 THE IMPACT OF THE COVID-19 PANDEMIC ON PUBLIC PERCEPTION OF CRUISE TOURISM: INSIGHTS FROM A THEMATIC ANALYSIS OF TWITTER HASHTAG ENGAGEMENT

Thursday, April 6, 2023 8:00 AM Salon A

We conduct a thematic analysis of hashtag engagement in a vast collection of tweets about cruise tourism that are posted on Twitter before and after the worst initial period for the cruise industry in the COVID-19 pandemic. Our analysis provides valuable insights into the impact of the pandemic on public perception of this tourism sector. The insights suggest an increasing demand for niche and specialty cruises and growing public attention to the sustainability of cruise tourism and its environmental impact.

Paper ID: 177 MANAGING CONCURRENCY IN CYCLICAL PROJECTS UNDER STOCHASTIC TASK ENVIRONMENTS: VACCINE DEVELOPMENT PROJECTS DURING PANDEMICS

Wednesday, April 5, 2023 10:00 AM Salon G

Aggressive overlapping of activities associated with vaccine development, approval, and gearing up for its manufacturing and distribution during the COVID-19 pandemic has been one of the major levers to make effective vaccines available to the public at "pandemic" speed. We provide a framework to manage the overlapping of stochastic tasks.

Paper ID: 178 THE IMPACT OF COVID 19 INDUCED REMOTE TEACHING ON STUDENT PERFORMANCE: EVIDENCE FROM AN INTRODUCTORY BUSINESS STATISTICS COURSE

Thursday, April 6, 2023 1:00 PM Salon C

The Covid-19 pandemic forced universities to close face-to-face learning and shift entirely to online instruction for a few terms. The swift and sudden movement toward remote teaching created significant challenges for students and instructors worldwide. However, both students and instructors got used to remote learning over time. Against this backdrop, this paper compares student performance before, during, and after the pandemic in an introductory business statistics course. Student grades are used as a proxy of student performance. Using exploratory data analysis and ANOVA models, this paper examines whether there is a significant difference in student performance due to Covid 19.

Paper ID: 182 COMPARISON OF MARKET VALUE PREDICTION MODELS: MULTIPLE LINEAR REGRESSION, DECISION TREE, AND NEURAL NETWORKS

Wednesday, April 5, 2023 8:00 AM Salon B

Real estate market value is of interest to buyers, sellers, and real estate agents. House sales is a key economic indicator and the decision to purchase a home is important for families. Market value predictions can help agents list at the best market value while forecast predictions can help the buyer set expectations. These prediction models use a residential data set of properties sold between 2008-2022. The characteristics used in the prediction models include internal and external variables e.g. # of bedrooms and bathrooms, pools, solar, and school district. A comparison of models will determine the best prediction model.

Paper ID: 183 SUBJECTIVE NORMS AND PRIVACY-PROTECTION BEHAVIORS

Wednesday, April 5, 2023 3:00 PM Salon D

Individuals with privacy concerns tend to perform more protection-oriented behaviors, while individuals with high perceptions of technology-use benefits tend to perform less protection-oriented behaviors. These findings create a privacy paradox for organizations when it comes to motivating employees to capitalize on the benefits of technology use while also minimizing the risks. This research examined the extent to which online-technology users' perceptions of social norms, their concern for privacy, and their perceived technology-use benefits affected their privacy-protection behaviors. The results of the analysis found that concern for privacy and perceived subjective injunctive norms are significantly, and positively related to privacy-protection behaviors.

Paper ID: 185 FACTORS AFFECTING USERS' PERCEPTIONS OF SOCIAL-MEDIA BENEFITS AND PRIVACY CONCERNS

Thursday, April 6, 2023 1:00 PM Salon C

This research examined the extent to which social-media users' privacy-invasion experience, risk intolerance, knowledge of privacy issues, and knowledge of others' privacy invasion experiences, influenced their concern for privacy and their perceptions about the benefits of using social media. The results of the analyses show that users' privacy-invasion experience, risk intolerance and knowledge of others' privacy-invasion experiences affected their concern for privacy. In addition, their level of risk intolerance had a negative effect on their perceptions of the benefits of using social media.

Paper ID: 186 ALWAYS B CREATING CEOS- THE SAXBYS APPROACH TO CREATING A NEW GENERATION OF CEOS

Friday, April 7, 2023 8:00 AM Salon A

Thousands of students major in Management, but typically management roles come years after earning a bachelor's degree. Few companies hire new graduates as CEOs or even as managers of other employees. How might universities provide executive management experience? A university/industry partnership with Aramark's B Corporation, Saxbys, provides an answer to this question. Students run a café with one serving as a paid CEO and several other students working as paid senior managers who also complete related courses for credit. The company is structured as B-Corporation permitting students to learn to do good for their communities while making a profit.

Paper ID: 187 SUCCESS AND GROWTH OF THE BANGLADESH GARMENT INDUSTRY AND ITS IMPACT ON GENDER EQUALITY IN BANGLADESH

Wednesday, April 5, 2023 3:00 PM Salon B

Bangladesh has also been one of the success stories, transforming itself from one of the poorest counties in the world to a lower-middle-income country in 40 years. The garment sector has been the driving force behind its growth and development. It has contributed to higher per-capita income and acted as a catalyst for social and economic development, especially gender empowerment. Using exploratory data analysis and time series models, this paper intends to investigate the reasons behind the rapid growth of the readymade garment sector in Bangladesh and its importance in promoting gender equality in Bangladesh.

Paper ID: 188 THE IMPACT OF ONLINE TESTING MODE ON BUSINESS ASSESSMENT TEST PERFORMANCE BEFORE AND DURING COVID

Wednesday, April 5, 2023 10:00 AM Salon A

This study attempts to share our experience when implementing online assessment format of BAT (Business Assessment Test) in pandemic and further compares the learners' BAT results when transitioning in-person assessment to online assessment at a university in Southern California. We examine 4,413 observations of students' BAT scores from Spring 2017 to Spring 2022, which covers prior- and COVID-era. The findings of learners' exit performance throughout the pandemic era enable us better fine-tune online assessment tools when we resume in-person instruction. The analytical results shed light on the deficiencies of learners' mastery which better guides us to design the "closing-the-loop" pedagogy.

Paper ID: 189 CAN INTERNATIONALIZATION STRATEGY ENHANCE CORPORATE INNOVATION? EVIDENCE FROM CHINESE MANUFACTURING INDUSTRY

Thursday, April 6, 2023 8:00 AM Salon G

We study whether internationalization strategies can help increase corporate innovations and empirically investigate this relationship for Chinese manufacturing companies listed on both the Shanghai and Shenzhen Stock Exchanges. We find Chinese manufacturing companies have experienced increases in corporate innovations as measured by both R&D investments and patent filings. We further find that companies with interlocking directorate board structure exhibit even stronger positive impact on innovations as they expand overseas to increase their relative international presence. We also find companies with relatively higher international exposures face increased litigation risk.

Paper ID: 190 A STUDY OF HIPAA SECURITY RULE COMPLIANCE IN SMALL AND MEDIUM-SIZED HEALTHCARE FACILITIES DURING COVID

Thursday, April 6, 2023 1:00 PM Salon B

The Health Insurance Portability and Accountability Act Security Rule (HIPAA-SR) was created to protect U.S. citizens' electronic personal health data. However, studies have shown that small and medium healthcare facilities have difficulties maintaining compliance, especially during COVID. A conceptual model is presented based on the theories of planned behavior, protection motivation, and general deterrence. A survey was administered to 284 employees of small and medium-sized healthcare institutions throughout the United States. The results showed a significant effect of Intention-to-Comply, Security-Awareness, Risk-of-Sanctions, and Top-Management-Support on HIPAA-SR compliance. This study extends the literature concerning HIPAA-SR and its compliance after the pandemic started.

Paper ID: 191 AN EVALUATION OF PEACOCK AND OTHER ONLINE STREAMING SERVICES USING TEXT DATA FROM SOCIAL

Wednesday, April 5, 2023 10:00 AM Salon C

Social media has been a significant part of many businesses and organizations. Firms are utilizing social media platforms to interact with their customers and clients to gauge the value of their products and services through diverse stakeholders. There are multiple stakeholders interested in social media information gathered from online reviews among various platforms including Twitter data for various purposes. To demonstrate the great potential of social media in unlocking the useful knowledge of market products, this paper describes an in-depth case study concerning text mining to analyze social media data.

Paper ID: 192 DIAMOND PRICE STATISTICS FOR BUSINESS ANALYTICS EDUCATION AND RESEARCH

Wednesday, April 5, 2023 3:00 PM Salon A

Diamond's 4C's grading system is a method to measure faceted diamond's quality according to its color, cut, clarity, and carat. The Rapaport Price List links diamond's 4C's with its price. The goal of this study is to investigate how diamond 4 C's affect the diamond price performance over the past ten years. The findings will be summarized for publication and used as a series of case studies in business analytics and related courses.

Paper ID: 193 AN ALGEBRAIC METHOD FOR THE EOQ MODEL WITH BACKORDERING

Wednesday, April 5, 2023 10:00 AM Salon G

The Economic Order Quantity (EOQ) model is the cornerstone of inventory management and all business students study it. It is often a challenge to teach the model because some students are not mathematically well-prepared. The model is optimized using differential calculus, and not all business students easily understand the derivation. When a second decision variable is added to the model, which happens with the planned backorders model, the challenge becomes even bigger. We present a simple method to teach the EOQ model with planned backorders to undergraduate business students or practitioners who are not well-versed in differential calculus.

Paper ID: 194 FEMALE DIRECTORS ON INVESTMENT SENSITIVITY TO Q: AN INFORMATION PROCESSING MODEL PERSPECTIVE

Thursday, April 6, 2023 8:00 AM Salon G

This paper examines whether female directors affect managers to follow the market in making investment decisions. We find that the presence of female directors reduces the sensitivity of investment to the misvaluation component of Tobin's Q, especially when firms are more likely overvalued. Instead, the presence of female directors increases the sensitivity of investment to internal measures of growth opportunities and reduces the likelihood of abnormal investment. Further analyses show that female directors may help with discerning the firm-specific valuation errors through their advising function. Our main results are robust to alternative explanations and endogeneity concerns.

Paper ID: 195 MOBILIZING A NATION: PERSUASIVE APPEALS IN VIETNAMESE WAR POSTERS

Wednesday, April 5, 2023 3:00 PM Salon C

How did the North Vietnamese government use propaganda posters during the Vietnam War (1963-1975) to rally Vietnamese people's support of its war efforts and win the war? Through an interpretive analysis of the iconography and texts in 141 posters, the study demonstrates four thematic appeals in Vietnamese posters during the war: 1/ Emotional appeals (hate and sympathy; pride and indomitability); 2/ Social appeals (total mobilization and patriotism; allegiance and solidarity); 3/ Authority assertion and dedication; 4/ Idealized future. The study delivers cultural and political insights for research in macromarketing, advertising and communication, art history, political science and Asian studies.

Paper ID: 196 ANALYZING SENTIMENTS ON AVOCADO USING TEXT MINING

Wednesday, April 5, 2023 10:00 AM Salon C

Twitter data contains a lot of information that might be relevant to business decision-making. However, most consumers and marketers have little understanding of the potential and application of Twitter data in marketing. This study offers some insights on the public debate on “avocado” using Twitter data and offers key findings on how such insights may be used for food marketing promotions or innovations in avocado retailing.

Paper ID: 197 THE IMPACT OF SUSTAINABLE SUPPLY CHAIN FINANCE ON SUPPLY CHAIN RESILIENCE

Wednesday, April 5, 2023 1:00 PM Salon G

Supply chain finance (SCF) has gained interest among academicians and practitioners amid the COVID-19 pandemic. Firms have started adopting SCF systems that promote sustainable practices to enhance supply chain resilience. However, the impact of sustainable supply chain finance (SSCF) practices on supply chain resilience is still in its infancy. This exploratory study systematically reviews SSCF literature and develops a framework by investigating the capabilities of SCF, the outcomes of SCF that promote sustainability, and their relationship to resilience. This research identifies the gaps in the literature and adds an understanding of SSCF and its impact on supply chain resilience.

Paper ID: 198 OPEN DATA PLATFORM TO PROMOTE GENDER EQUALITY POLICIES IN STEM

Friday, April 7, 2023 10:00 AM Salon A

Women are still underrepresented in Science, Technology, Engineering, and Mathematics (STEM). In the last decade, government and academic institutions have developed initiatives and policies to increase the participation of women in STEM. However, they are rarely published in an open and structured way. This research proposal presents a plan to develop an open data platform of existing policies and initiatives that promote gender equality in STEM in three countries in South America, Bolivia, Brazil, and Peru with an emphasis in technology areas. This project, funded by the Canadian government, has three phases from 2022 to 2025.

Paper ID: 199 CAUSES OF FOOD INSECURITY: A SYSTEMATIC REVIEW

Thursday, April 6, 2023 10:00 AM Salon D

In this study, we have reviewed the literature and identified different socioeconomic and environmental factors that have contributed to the prevalence of food insecurity. Our review showed that prevalence of food insecurity varies for different genders, age groups, as well as races and ethnicities. This is mainly due to different socioeconomic and environmental condition these demographic subpopulations are facing. Our review showed some contributing factors listed in different studies are household size, financial status (income level), educational degree, educational institutions, occupation, housing status, as well as medical care availability.

Paper ID: 201 USING SCENES FROM A MOVIE TO IMPROVE HR SKILLS AND DECISION-MAKING

Thursday, April 6, 2023 10:00 AM Salon A

A growing number of peer-reviewed articles describe methods of using movie clips to improve teaching in areas such as language, family theory, chemistry, and pharmacology. A recent article by Reyes-Santias et al. (2022) provides a step-by-step process. This paper expands on their research to move from presenting a case followed by debate to an approach in which movie clips are selected that require analysis of the situation and model for role playing what might have been done differently. These activities help students build skills such as conducting a performance review, delivering developmental feedback or terminating an employee.

Paper ID: 202 CREATING A PIPELINE OF K-12 TEACHERS FROM EXISTING PARAEDUCATORS

Thursday, April 6, 2023 1:00 PM Salon C

The pupil/teacher ratio in US elementary and secondary schools fell from 15.7 in 2003 to 15.4 in 2016 according to the National Center for Education Statistics (Kena et al., 2016). The number of teachers leaving the profession exploded during the pandemic. Public school teachers earn 20 percent less than non-teacher college graduates. In a majority of states, teachers who are the sole earners in their household qualify for two or more government assistance programs. This study focuses on the induction and mentorship of employees working in teaching adjacent roles, such as teaching aids, yard supervisors and behavior-based interventionists.

Paper ID: 203 CAN LESS BECOME MORE? STATIC AND DYNAMIC RATIONALITY CONCEPTS IN ECONOMIC TRANSACTIONS: FINDINGS FROM AN EXPERIMENTAL STUDY

Wednesday, April 5, 2023 1:00 PM Salon B

Human conduct in economic transaction processes has been modelled along the notion of the ‘economic man’ in mainstream economics ever since, whereas more recent approaches of behavioral economics heavily challenge that concept close to Laplace’s demon. The former assumes that actors in transaction processes (i.e. exchange of goods and services) behave strictly in pursuit of their material benefit, whereas the latter emphasises “social” preferences like fairness and reciprocity. We theoretically analyse the foundations of the homo oeconomicus model in the first place and in comparison to the homo socialis concept as a contrasting theorem.

Paper ID: 204 HYBRID PHISHING EMAIL DETECTOR BASED ON EMAIL FEATURES AND CONTENTS

Wednesday, April 5, 2023 10:00 AM Salon B

Cybercrime events have been increasing quickly in recent years. Therefore, how to detect them becomes essential in many enterprises. According to related research, the major trend of phishing email detection methods is using only email context or functionality. In this manuscript, we consider using email contents and features with the specifically designed extractor to capture critical parameters to train the selected machine-learning algorithms. Then the individual models for email contents and features are built. The prediction results are combined by an OR operator to create a hybrid detector. The performance includes accuracy 0.9977, precision 0.9907, recall 1.0000, and F-measure 0.9953.

Paper ID: 205 COMPETITIVE AWARENESS OF CHINESE AND DEVELOPED ECONOMY MULTINATIONALS

Wednesday, April 5, 2023 1:00 PM Salon B

In this article, we develop a framework to explore the differences of competitive awareness between Chinese multinational enterprises (CMNEs) and developed-economy multinational enterprises (DMNEs). First, we categorize the sources of competitive awareness into four quadrants based on the known or unknown information to both DMNEs and CMNEs. All four quadrants represent different challenges as firm strategy depends on how accurately firms perceive their competition. Second, we apply our framework to four different competitive landscapes as the home country of the CMNE, home country of the DMNE, another emerging economy, and another developed economy.

Paper ID: 206 THE DECLINE OF MEN IN THE WORKFORCE: A VOCATIONAL INTEREST VARIABILITY PERSPECTIVE

Wednesday, April 5, 2023 3:00 PM Salon B

Vocational interests are the most widely used psychometric tools in career choice and selection. Gender effects within vocational interests can help explain the differences in occupational choices observed such as the under-representation of women in STEM fields (Su et al., 2009). In this paper, we examine one such gender difference between men and women: the vocational interest variability (differentiation) across different age groups. People with highly differentiated interests are cognizant of and possess clarity regarding which work activities they are interested or disinterested in.

Paper ID: 207 A GAP ANALYSIS FOR INFRASTRUCTURE REQUIREMENTS OF THE TRANSITION TO ZERO-EMISSION VEHICLES IN THE STATE OF CALIFORNIA

Wednesday, April 5, 2023 8:00 AM Salon D

California's Clean Energy executive order mandates that all operations of medium and heavy-duty (MDHD) vehicles will be 100% zero emissions by 2045. For passenger vehicles, the mandate goes into effect by 2035. The location and availability of charging infrastructure are one of the most important factors for fleet companies to boost electric vehicle adoption. The objective of this research is to identify the optimal locations for Zero Emission Vehicles (ZEV) public charging stations for the transition to electric fleet. The focus of the current phase of this research is on estimating the demand for charging stations.

Paper ID: 208 PROPERTIES OF THE VARIANCE OF ANALYSTS' FORECAST OF EARNINGS IN GOOD-NEWS AND BAD-NEWS ENVIRONMENTS: THEORY, EVIDENCE AND USEFULNESS

Thursday, April 6, 2023 3:00 PM Salon A

This study documents that the variance of analysts' forecast of earnings is smaller when the expected or actual news about earnings is good (relative to when it is bad). An examination over the entire fiscal year provides evidence of earlier consensus building amongst analysts, as measured by reduction in variance over time in the good-news environment. Forecasts of earnings can be improved when variance of analysts' forecasts are used along with its mean. A trading strategy based on the variance of analysts' forecasts earns positive abnormal returns, when conditioned upon the nature of the news.

Paper ID: 210 LESSONS LEARNED FROM FAILED DIGITAL FORENSIC INVESTIGATIONS

Wednesday, April 5, 2023 1:00 PM Salon A

The goal of this study is to identify possible factors contributing to digital forensics deficiencies leading to inadmissible evidence. We analyze five cases of failed DFI to identify common patterns and elements within each phase of the DFI process. We use a multilayered approach based on human, technical, and organizational dimensions to investigate the reasons for DFI failures.

Paper ID: 211 CIRCULAR ECONOMY THROUGH A MARKET MAKER

Thursday, April 6, 2023 8:00 AM Salon D

The goal of circular economy is to achieve sustainable economic growth and social development. However, prior literature is focusing on achieving circular economy on a single firm's level, which is very challenging beyond a certain degree since there is limit to material being reused and staying in the same circular loop of one firm, or even of one industry. One such policy that promote the circular economy is the take back policy. Instead, achieving circular economy on macro level becomes more feasible since it allows other companies to take back a firm's products through market matching.

Paper ID: 213 PROPOSAL OF A SOCIAL MARKETING INDEX FOR THE BANKING INDUSTRY; A PILOT STUDY FROM TURKEY

Thursday, April 6, 2023 3:00 PM Salon A

Undoubtedly, COVID-19 taught that all organizations worldwide should seriously reconsider sustainability once more since many people either died or became sick during the pandemic. Thus, everyone tried to make people stay safe and well during this unprecedented time. In addition, protecting the environment and contributing to the communities were also significant. Thus, the most critical question that could be raised in this environment would be, "who is doing what to influence behavior changer societal gain together with financial gain?" The question could be customized to industries, sectors, or a specific company or corporation.

Paper ID: 214 SWIFT TRUST WITH TECHNOLOGY: IS IT POSSIBLE?

Wednesday, April 5, 2023 10:00 AM Salon B

Swift trust is a form of trust that arises when people are expected to work under the time pressure to accomplish a common goal with other members who they might not have met face-to-face before. This makes it difficult to acquire the essential prerequisites for traditional trust. The swift trust literature comprises studies concerning about human-to-human swift trust, but the nature of today's work also requires one to work with technology. In this study, we review the existing findings of trust in technology and explore the possibilities of swift trust together with technology. Managerial implications will be provided.

Paper ID: 215 SLOTTING FEE PRICING MODEL: A COMPARISON OF TRADITIONAL AND E-COMMERCE BUSINESS

Thursday, April 6, 2023 10:00 AM Salon D

Slotting allowances and slotting fees were defined as the payments by manufacturers to persuade downstream channel members to stock, display, and support new products. Two schools of thought offer different viewpoints on the impact of collecting slotting allowances and slotting fees. One argues that the collection of slotting allowances and slotting fees improves distribution efficiency and stipulates competition while the other thought argues that these fees damage competition. In general, retailers agree more on the former view and manufacturers prefer the latter.

Paper ID: 216 TWO-PHASE HYBRID FLOWSHOP SCHEDULING PROBLEM TO MINIMIZE COMPLETION TIME

Thursday, April 6, 2023 3:00 PM Salon C

In this study, a scheduling problem to minimize total completion time of jobs in an assembly line with two-phase flow shop is considered. In the first phase, there are m machines in which different types of parts are manufactured respectively and those m parts are assembled at single machine in the second phase. We formulated this problem as a mathematical form to obtain optimal solution for a small sized problem since this problem is known to be NP-hard. Simulation study with randomly generated data is conducted to evaluate the suggested methods with optimal solution.

Paper ID: 220 HUMAN ACTIVITY CALORIES CONSUMPTION CALCULATION BASED ON SKELETON DETECTION

Thursday, April 6, 2023 10:00 AM Salon G

Statistically, obese people are three times more likely to have dyslipidaemia, diabetes and metabolic syndrome, and twice as likely to have osteoarthritis of the knee, high blood pressure, gout and cardiovascular disease as the average person. While the calorie content of a food product can be determined from its nutritional label, there is no way of knowing the calorie consumption corresponding to the different activities in life in order to maintain a calorie balance. This study reviews previous research on human activity heat expenditure and proposes a robust, non-contact method of identifying human activity that doesn't require any sensor device.

Paper ID: 222 THE DISCUSSION OF THE EFFICIENCY, ENERGY CONSERVATION, AND CARBON REDUCTION OF THE CLOUD TIMING SYSTEM IN MARATHON EVENTS

Thursday, April 6, 2023 8:00 AM Salon D

Economic development and excessive material enjoyment have led modern people to pay increasing attention to sports to enhance their health, and running has become one of the sports choices for many people. Large marathon events require the use of accurate chip timing systems for timing and ranking because of the competition and the award of prizes. The cloud timing system avoids several difficulties and the advantages are: omitting long network cable to connect the timing zone and printing zone, helping the moving line arrangement of the venue, and also avoiding the inconvenience caused by network disconnection.

Paper ID: 223 SUPPLY CHAIN RESILIENCE: EVIDENCE FROM EMPIRICAL STUDY OF BULLWHIP AND REVERSE BULLWHIP EFFECTS ACROSS NATIONS

Wednesday, April 5, 2023 1:00 PM Salon G

Recent scattered research has indicated some sectors consistently amplify while others dampen the price or demand variances in supply chains. We propose to examine the bullwhip (BWE) or reverse bullwhip (RBE) patterns in supply chains in a few countries, where the industry level statistics are available. Furthermore, a regression model will be utilized to identify contributing factors related to a sector's variance regulation behaviors. The prediction is that we will observe Supply Chain Resilience in the data, i.e., sectors operating in an unfavorable environment tend to smooth the supply chain fluctuation.

Paper ID: 224 EVALUATING AIR FORCE LOGISTICIAN'S RISK INFORMATION SEEKING DURING THE COVID-19 PANDEMIC

Thursday, April 6, 2023 10:00 AM Salon C

As a key enabler of military power and the foundation for military operations, Air Force (USAF) logistics organizations must be able to sustain operations throughout times of crisis and extreme uncertainty. With effective communication being one of the most important factors in responding to and preventing the spread of the COVID-19 virus, the manner in which USAF logistics organizations communicated may have been key to continuing the mission and keeping Airmen safe. This research aims to determine if an expanded Planned Risk Information Seeking Model can be used to evaluate the effectiveness of USAF logistics organization's meetings during the pandemic.

Paper ID: 298 ESTATE AND GIFT PLANNING TECHNIQUES UNDER FEDERAL AND STATE TRANSFER TAX SCHEMES

Thursday, April 6, 2023 1:00 PM Salon G

In this special session, we will present a summary of decedents' estate procedures in state probate court before providing a survey of "alphabet soup" trust techniques for transferring wealth, including relevant concepts in federal estate and gift tax law, federal income tax law, and state property tax law.
